# NOTICE OF OPEN MEETING

Persons with disabilities requiring special services or accommodations to attend the meeting can make arrangements by calling the Air Pollution Control Program directly at (573) 751-4817, or by calling the division's toll-free number at 1-800-361-4827. Hearing impaired persons may contact the program through Relay Missouri, 1-800-735-2966. Please visit our web site at [www.dnr.mo.gov](http://www.dnr.mo.gov).

## AGENDA

Missouri Air Conservation Commission Meeting  
Governor Office Building  
Room 450  
200 Madison Street  
Jefferson City, MO 65101  
August 25, 2005  
9:00 a.m.

Commissioners and Stakeholders Meeting  
Governor Office Building  
Room 450  
200 Madison Street  
Jefferson City, MO 65101  
August 25, 2005  
1:00 p.m.

| 4. | Operations Report | 37 | Jim Kavanaugh       |
| 5. | Director's Report |    | Leanne Tippet Mosby |

**D. Unfinished Business**

None.

**E. Public Hearing**

None.

**F. Recommended for Adoption and Actions to be Voted on**

- |   |    |            |
|---|----|------------|
| 10 CSR 10-1.030 (new rule) Air Conservation<br>Commission Appeals and Requests for Hearings | 41 | Paul Myers |
|---|----|------------|

This proposed rule is a product of the Commissioner's Core Workgroup and contains all procedural regulations for all contested cases heard by the commission or assigned to a hearing officer by the commission. The Commissioner's Core Workgroup was formed to establish uniform policies and procedures to be used by the state's environmental commissions for conducting business on contested cases.

- |   |    |              |
|---|----|--------------|
| 10 CSR 10-6.110 (amendment) Submission of Emission Data,<br>Emission Fees and Process Information | 45 | Ron Jeffries |
|---|----|--------------|

This proposed amendment will establish the emission fee for Missouri facilities as required annually. The air emission fee for calendar year 2005 is proposed to be increased from \$33.00 to \$35.50 per ton of regulated air pollutant. Also, this proposed amendment will change the fee payment and Emissions Inventory Questionnaire

submission date from April 1 to June 1 each year for  
United States Department of Labor Standard Industrial  
Classification 4911 Electric Services.

Kevin Perry, REGFORM  
James Lanzafame, The Doe Run Company  
Michael Manning, Kansas City Health Department

Russell Rice, Associated Electric Cooperative, Incorporated  
David Shanks, Boeing  
Mary Lou Taylor  
Steven Whitworth, Ameren Services

**A. Call to Order**

Chairman Mike Foresman called the July 21, 2005, meeting of the Missouri Air Conservation Commission to order. Chairman Foresman noted the following commissioners were present: Jack Baker, Mark Fohey, Mike Foresman, Mark Garnett and Dennis Voisey.

**B. Minutes, July 21, 2005, Meeting**

Commissioner Jack Baker moved to approve the minutes as written. Commissioner Dennis Voisey seconded and all commissioners voted to approve the minutes.

**C. Reports - The following referenced reports are in the July 21, 2005, Missouri Air Conservation Commission Briefing Document.**

**1) COMPLIANCE/ENFORCEMENT**

Steve Feeler noted that there was no Complaint Report in the Briefing Document this month due to the commission meeting beginning a week earlier than usual. The August 2005 briefing document will include two Complaint Reports.

Mr. Feeler stated that Brian Newby spent three days at some of the larger Premium Standard Farms (PSF) facilities and spoke to a lot of complainants and PSF staff. Mr. Newby did not find any odor violations. Mr. Newby said he did experience odor on a steady basis, but not enough to detect an odor at a 7:1 dilution on the scentometer.

Mr. Feeler said that he spoke with Robert Brundage and Mr. Brundage will be making a presentation on current activities at the PSF facilities at the August 2005 commission meeting in Jefferson City.

Mr. Feeler noted that the Settlement Update begins on Page 13 of the Briefing Document.

**2) PERMITS**

Kyra Moore referred the commission to the Permit Reports beginning on Page 23. In the month of June, the program received 38 construction permit projects and 29 operating permit projects. The Permit Applications Completed Report begins on

Page 32. In June, the program completed 42 construction permit projects and 25 operating permit projects.

Ms. Moore referred the commission to the Operating Permit Progress Report beginning on Page 42. Three Part 70 operating permits are on public notice: Southwestern Bell; Waterloo Industries; and Plaze Industries.

The Boeing Part 70 Operating Permit will go on public notice July 24, 2005. This permit was previously issued, but was reopened for cause at the request of EPA. The portions that EPA requested to be changed were fixed, and only those portions of the permit are open to public comment.

The program continues to work with Kansas City Power and Light to complete the review of their application. The program anticipates that the public notice process will begin in August before the commission meeting.

### **3) OPERATIONS**

Mr. Kavanaugh referred the commission to the three Operations reports beginning on Page 43 with the Rules and SIP Agenda followed by the Rules in Progress Schedule on Page 289 and the State Air Quality Plans Status Report on Page 293.

The Rules and Progress Schedule on Page 316 lists the Rules and Development Web site. More complete information can be found on the Web site.

Mr. Kavanaugh noted that the program will be moving to 1659 East Elm Street in Jefferson City. The move should be completed by July 29, 2005.

The program continues to observe exceedances of the 8-hour ozone standard in Kansas City and St. Louis. There is only one monitor violation in the St. Louis area, the West Alton monitor. As of July 18, 2005, there have been 38 exceedances in St. Louis and 13 exceedances in Kansas City. There have been three exceedances in the out-state area. The fourth highest exceedance averaged over a three year period is what determines a violation. Violations determine the classification of the area and dictate which controls will be mandatory. Even though the 1-hour standard has been revoked, the program is still required to monitor it. There are contingency measures in the State's maintenance plans that are triggered by 1-hour monitoring values. So far this year, there has been one exceedance in East St. Louis on the Illinois side and only three monitor values above 120 parts per million. (The 1-hour standard is 125 parts per million.) The data still needs to be quality assured.

On July 13, 2005, EPA published a Federal Register proposing to approve an amendment to the Missouri Statewide NO<sub>x</sub> Rule. Mr. Kavanaugh clarified that this rulemaking has nothing to do with the NO<sub>x</sub> SIP Call rules that the commission

heard testimony on over the last two months. This rule was established several years ago. It was a statewide rule for electric generating utilities to address the problem in St. Louis, but also upwind in Chicago and other parts of the country. The commission adopted that rule in April of 2003. The department allowed for a higher emission rate in the western part of the state for facilities burning tire derived fuels. AmerenUE had agreed to a lower emission rate to balance out the overall emissions.

The first Open Burning Workgroup meeting was held on July 14, 2005. The meeting was in response to a number of petitions received from citizens. The majority of complaints statewide involve open burning. The workgroup is looking at those rules to see if the program can clarify ambiguity and eliminate inconsistencies. There are currently four separate open burning rules throughout the state. One idea is to possibly consolidate them into one rule. It is a fairly large undertaking. The program has involved several fire departments, regulatory agencies and citizens that have expressed interest. There will be another meeting on August 23, 2005 with a broader audience. A Web site has also been established that will post the meeting minutes. [Note the Web site is: [www.dnr.mo.gov/alpd/apcp/open\\_burning/open\\_burning.htm](http://www.dnr.mo.gov/alpd/apcp/open_burning/open_burning.htm).]

There will be an Inspection and Maintenance (I/M) Summit meeting in St. Louis on July 22, 2005. The meeting will focus on what the I/M program should look like after 2007. The current contract ends in 2007.

#### **4) DIRECTOR'S REPORT**

##### **a) Southeast Regional Office**

Leanne Tippet Mosby addressed the commission and introduced Southeast Regional Office Director, Gary Gaines.

Mr. Gaines welcomed the commission and thanked them for having the commission meeting in Poplar Bluff so citizens and regional office members could attend. Mr. Gaines introduced two of his staff members, Amy Baker and Jan Dunlap-Chronister.

##### **b) Department Reorganization**

The department is currently undergoing reorganization. Director Childers had hoped to make an announcement regarding the reorganization in early July, but circumstances precluded the announcement. The program does not have a schedule of when he will make his announcement. The reorganization will result in the department having a Field Services Division. A team is working on how the new division will interplay with

the various media programs. Mr. Feeler has been participating in that team to provide a perspective from the program.

**c) New Office Location**

The program will have the same Post Office Box address. However, it will have a new address for people who want to send mail to the program via Federal Express, etc. The street address is 1101 Riverside Drive, Jefferson City, MO 65101. [Note: this is the location of the department's central mailroom in the Lewis & Clark State Office Building.]

**d) I/M Summit**

The I/M Summit is expected to be very well attended. The program invited approximately 94 people and a little over 50 people have responded to the invitation. The program expects 10 to 15 legislators to attend.

**e) Air Program Advisory Forum**

The next Air Program Advisory Forum will be on August 24, 2005 from 1 p.m. to 4 p.m. in the Lewis and Clark State Office Building. The Lewis and Clark State Office Building (LCSOB) is also known as the Green Building. Holding the meeting at LCSOB will give attendees the opportunity to view the new building. Ms. Tippet Mosby welcomed the commissioners to attend the meeting.

**f) Commissioner/Stakeholder Meet and Greet**

Ms. Tippet Mosby inquired if the commission would be available in the afternoon, after the August 25, 2005 commission meeting, to meet with stakeholders.

Chairman Foresman stated that would be agreeable.

**g) Air Emissions Fee**

Ms. Tippet Mosby announced that Carolyn Kliethermes would be giving a presentation about the Air Fee proposal for this year.

Ms. Tippet Mosby stated that she was sure the commission would hear testimony from the program's stakeholders about the presentation. Once again, the program has had a very open process this year. There has been a lot of exchange of information. The process has been done this way now for the past two or three years, that is, having a couple of preliminary

presentations before the formal public hearing. This year, two presentations were made to the Air Program Advisory Forum. In the public hearing, the commission might hear perspectives different from that of the program's perspective, and there will be a lot of information for the commission to consider. The program is willing to provide any follow-up information the commission might need after the presentation. The program has a very good process for hearing stakeholders concerns and that will probably be reflected in the testimony today.

**D. Unfinished Business**

None.

**E. Public Hearing**

Chairman Foresman called the public hearing to order.

Paul Myers presented 10 CSR 10-1.030 (new rule) Air Conservation Commission Appeal and Requests for Hearings. Information on the new rule begins on Page 49 of the July Briefing Document.

Carolyn Kliethermes gave a presentation on the Annual Budget/Fiscal Report. Information on the presentation begins on Page 61 of the July Briefing Document. Appendix A contains the Emission and Permit Fee Analysis of the presentation.

Ron Jeffries presented 10 CSR 10-6.110 (amendment) Submission of Emission Data, Emission Fees and Process Information. Information on the proposed amendment begins on Page 79 of the July Briefing Document.

To obtain a copy of the hearing transcript, please contact the court reporter.

**F. Recommended for Adoption or Actions to be Voted on**

Tiffany Campbell presented comments and responses to Missouri State Implementation Plan – Update to Kansas City Maintenance Plan for Control of Ozone. Information on the proposal begins on Page 95 of the briefing document.

Commissioner Dennis Voisey moved to adopt the Maintenance Plan revision as revised. Commissioner Jack Baker seconded, all commissioners voted to adopt the proposed plan revision.

Wayne Graf presented comments and responses to Missouri State Implementation Plan—Doe Run Herculaneum, Modification to Consent Judgement. Information on the proposal begins on Page 149 of the briefing document.

Commissioner Baker moved to adopt the Consent Judgement modification as revised. Commissioner Mark Fohey seconded, all commissioners voted to adopt the proposed modification.

Ron Jeffries presented comments and responses to 10 CSR 10-2.390 (amendment) Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Developed, Funded or Approved Under Title 23 U.S.C. or the Federal Transit Laws. Information on the order of rule making begins on Page 155 of the briefing document.

Ron Jeffries also presented comments and responses to 10 CSR 10-5.480 (amendment) Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Developed, Funded or Approved Under Title 23 U.S.C. or the Federal Transit Laws. Information on the order of rule making begins on Page 219 of the briefing document.

Commissioner Mark Garnett moved to adopt the two orders of rule making as revised. Commissioner Fohey seconded, all commissioners voted to adopt the two orders of rule making as revised.

## **G. New Business**

### **a) AGO Referrals**

Mr. Feeler presented a referral request for Mr. Ron Sells. Information on the proposed referral begins on Page 309 of the briefing document. Mr. Feeler noted that Mary Lou Taylor, one of the complainants, came to the meeting to support referral of Mr. Sells' case to the AGO. Mr. Feeler stated that Ms. Tippet Mosby had spoken with Mr. Sells and wanted to convey some information to the commission.

Ms. Tippet Mosby stated that Mr. Sells had called to speak with David Gilmore to inform him he would not be able to attend the August 25, 2005 commission meeting due to a schedule conflict. Ms. Tippet Mosby said that Mr. Sells wanted to relay to the commission that he felt it was the contractor's responsibility to control the dust.

Ms. Tippet Mosby stated that she explained to Mr. Sells that the commission had at least two actions they might take. The first action would be to approve referral of the case to the AGO. If the commission approved referral of his case to the AGO, then the program would go ahead and refer his case to the AGO. Ms. Tippet Mosby informed Mr. Sells that this action would not result in automatic filing of a lawsuit, but rather it would begin a negotiation process. The second action the commission could take would be to defer his case to a later meeting, or not act on it.

Ms. Tippet Mosby said that Mr. Sells' main purpose in calling was to make sure that the commission understood he was not intentionally ignoring the situation.

Mr. Feeler noted that initially Mr. Sells did request the program move forward with referral to the AGO.

Chairman Foresman inquired if Mr. Sells was still represented by council.

Mr. Feeler replied that he did not know.

Ms. Tippet Mosby stated that she thought Mr. Sells was more concerned that his absence might send some message to the commission that was not intended. He did not express an extreme desire to address the commission in person.

Chairman Foresman recommended the matter be deferred to the commission meeting in August and asked that the program notify him no action was taken. This would give Mr. Sells another opportunity to attend the meeting and to address the commission if he so desired.

Ms. Tippet Mosby stated that she would notify Mr. Sells as requested. Ms. Tippet Mosby inquired if it would be alright if Mr. Sells provide a written statement to the commission in case he could not make it to the August 2005 commission meeting in Jefferson City.

Chairman Foresman replied that would be agreeable and also noted that it was not necessary for Mr. Sells to incur the expense of an attorney to be present at the August 2005 commission meeting. The presence of an attorney would not weigh on the decision of the commission.

Mr. Feeler presented a referral request for Millennium Wrecking, Incorporated. Information on the proposed referral begins on Page 313 of the briefing document.

Commissioner Dennis Voisey moved to refer Millennium Wrecking, Incorporated to the AGO. Commissioner Fohey seconded the motion. All commissioners voted for referral to the AGO.

**b) Necessity Findings**

Mr. Kavanaugh requested the commission approve three necessity findings for proposed rule amendments to 10 CSR 10-5.510, 10 CSR 10-6.060 and 10 CSR 10-6.100.

10 CSR 10-5.510 (amendment) Control of Emissions of Nitrogen Oxides. The rule contains a list of acceptable emission test methods that industry can use to determine NO<sub>x</sub> emission rates. The program would like to add another method to that list so industry will not have to request agency approval to use it. No comments were received during the public comment period.

10 CSR 10-6.060 (amendment) Construction Permits Required is a rule to adopt federal provisions for New Source Review requirements for non-attainment areas. The close of that comment period ends August 25, 2005. So far, no comments have been received and the program requested the commission's approval so it could move forward when the timeline is up.

10 CSR 10-6.100 (amendment) Alternate Emission Limits will change a reference to 10 CSR 10-6.060. The rule currently references the wrong paragraph. The program requested the commission's approval to amend the rule so it would reference the correct paragraph. Since it is an administrative change, it does not require a 60 day precomment period.

Commissioner Baker moved to approve the Necessity Findings for 10 CSR 10-5.510, 10 CSR 10-6.060 and 10 CSR 10-6.100. Commissioner Voisey seconded; all commissioners voted to approve the findings.

#### **H. Appeals and Variance Requests**

None.

#### **I. Open Session**

There were no requests to address the commission.

<b>Comments</b>	Mr. Richard Vani, an investigator with the department's Kansas City Regional Office (KCRO) conducted an inspection of the quarry. Haul roads were well watched for minimal dust from the crushing plant. Mr. Vani did not observe any dust going beyond property boundaries.								
<b>Comp. No.</b>	KC10170	<b>Comp. Info</b>	The complainant states there is dust everywhere. He is pretty sure it is coming from the Norris Aggregate quarry.						
KCRO	6/5/2005	5/31/2005	MARK SNIDER	Cleveland	Cass	Burning/Other	Keri VanMevern	MRM	A2256
<b>Comments</b>	There was no burn permit obtained for a bush fire that got out of control. Mr. Michael Miller, an investigator with the department's KCRO, will issue Notice of Violation #A2256KC.								
<b>Comp. No.</b>	KC10185	<b>Comp. Info</b>	The reported party two lots south had a large brush fire on March 6, 2005, without a burn permit. Strong winds from the south (30 MPH) spread the fire to the lot just south of the complainant with long grass (12"). When this lot caught on fire, the fire spread to the complainant's lot to the north. Fire damaged the complainant's electric fence and chargers. The complainant had to fence her front yard to move the horses there. Fire trucks damaged a "gray water" pipe in her back yard and left tracks that required re-grading and seeding to restore.						
KCRO	6/7/2005	6/7/2005	WOODBURY SUBDIVISION	Grain Valley	Jackson	Burning	Anonymous	RAV	
<b>Comments</b>	Mr. Richard Vani saw no evidence of open burning at the time of the investigation. According to the Central Jackson Fire Department, some subcontractors had been open burning construction waste and had been warned by the fire department not to do so again.								
<b>Comp. No.</b>	KC10199	<b>Comp. Info</b>	The complainant reported paint waste and construction debris from a construction site is being burned						
KCRO	6/8/2005	6/8/2005	WOODBINE HEALTH CARE	Gladstone	Clay	Asbestos	Anonymous	MRM	
<b>Comments</b>	Mr. Michael Miller, an investigator with the department's KCRO, states the project is not regulated, (because L-260 SE of Non-RACM being disturbed) and the dust from the concrete floor is non-asbestos containing.								
<b>Comp. No.</b>	KC10184	<b>Comp. Info</b>	The complainant states that the maintenance man is using a jack hammer to remove 9 X 9 floor tiles from the second floor of the Woodbine Health Care Facility. The area is approximately 100 square feet where the tiles are being removed from. The complainant states white dust is being observed on surfaces and in the area. Recent renovation and remodeling of walls and other surfaces have occurred.						
KCRO	6/8/2005	6/8/2005	SHIRLEY HUDSON	Plattsburg	Platte	Burning	Robert Utz	RAV	
<b>Comments</b>	Mr. Richard Vani found no evidence of open burning at this time. A house had burned down. No one was seen on site.								
<b>Comp. No.</b>	KC10191	<b>Comp. Info</b>	The complainant reports the reported party burned piles of brush on May 29, 2005. The complainant states the reported party does some landscaping work and brings brush to her property. Her house burned down on May 14, 2005. The complainant previously contacted the KCRO on April 4, 2005, for the reported party conducting open burning.

NERO	6/17/2005	STOLTZ	Jefferson City	Cole	Other	Anonymous	SMB	
<b>Comments</b>	Mr. Steve Boone, an inspector with the department's Northeast Regional Office (NERO), told the complainant to contact the Sheriff's office if they are notified about burning on Saturday night. Mr. Boone, left a message for Mr. Terry Benson with the Cole County Prosecuting Attorney's office at (573) 634-9180 to contact him this afternoon. Mr. Boone contacted the Cole County Sheriff's office and asked for someone who may know about the Stoltz property. (573) 634-9160. Mr. Boone spoke with a deputy who did not find a telephone number for Stoltz on their database. If someone contacts you about a fire, they will ask the fire department to respond and put out the fire. On June 20, 2005, Mr. Boone spoke to Mr. Terry Benson with the Cole County Prosecutor's office. Mr. Benson expects to be able to address the issue after September 30, 2005, evidently with a county ordinance. The Prosecuting Attorney's office received a call about tall weeds and a junky RV at the property. Mr. Boone told the prosecutor the department had received a report about burning.							
<b>Comp. No.</b>	NE11454	<b>Comp. Info</b>	The complainant reports a pile of tires and other trash were piled up and it is going to be burned on Saturday night when nobody will be around. The complainant claims the reported party poured transmission oil on the pile of waste. The complainant states the waste is sitting next to the road by a neighbor's house. Reportedly, the Prosecuting Attorney told the reported party to clean up the property and this is likely as a health department violation.

<b>Comments</b>								
<b>Comp. No.</b>	NE11386	<b>Comp. Info</b>	The complainant states trash is being dumped on a property near the Mississippi River on the River side of the levy. Trash has been dumped there for the last year. The new owner brings in truck loads of all kinds of trash. Sometimes it is demolition waste and other times it is dirt and trees or tree trunks. The reported party will burn the waste and then bury the rest. The trash is hauled there by the dump truck load. The reported party has at least two dump trucks that haul in the waste. The reported party then brings in his own equipment to bury the waste. Yesterday, he started hauling in more waste. This time it is demolition waste, appliances, and metals (described as the material left from tearing down a house). There are several locations on the property where holes have been dug and material has been buried.

<b>Comments</b>	Mr. Steve Boone contacted the reported party, Ms. Donna Broadwell at her property. Ms. Broadwell stated they had burned the foundation of a small shed that morning. Mr. Boone viewed the ashes and it appeared the shed measured approximately six to eight square feet. Ms. Broadwell stated they had some shingles that may have gotten in the fire. Mr. Boone gave her a copy of the open burning rules and the construction and demplition waste bulletin and discussed requirements for burning. Ms. Broadwell stated she was unaware of these requirements. Mr. Boone requested she stop disposing of the waste by burning. Ms. Broadwell stated they still had a few shingles from the building. Mr. Boone informed her that they needed to be taken to a landfill for disposal. Mr. Boone looked at the area and did not observe any shingles in burn area.								
<b>Comp. No.</b>	NE11361	<b>Comp. Info</b>	The complainant reports sheds are being burned at a property in Novinger and black smoke is coming from shingles being burned with the sheds.

<b>Comp. No.</b>	NE11407	<b>Comp. Info</b>	On May 31, 2005, at 9:23 p.m., the complainant filed two reports of odors from PSF Whitetail as follows. "May 31, 2005, as the complainant drove by the site she was overwhelmed with the odor coming off this factory farm the odor was a strong gassy/lagoon smell. The odor made it impossible to breathe and it burned the complainant's eyes and nose. On May 31, 2005, odor has been with the complainant off and on all day. The odor has been anywhere from a pure hog manure/lagoon odor to a strong hog barn smell. The complainant tried working in the yard this evening, but had to give it up. The complainant developed a headache and was sick to her stomach. "They are prisoners in their own home from this factory farm and not able to enjoy their property."

NERO	6/2/2005	5/31/2005	KEVIN RACKERS EXCAVATING	New Bloomfield	Callaway	Burning	Paul Jeffery	MIH	
<b>Comments</b>	Ms. Mary Hopke an inspector with the department's NERO, met with the property owner, Mr. Tom Snodgrass, a worker for Kevin Rackers Excavating. Mr. Snodgrass stated he was not aware a burn permit had to be obtained. No burning was being done at the time of the investigation. Ms. Hopke advised Mr. Snodgrass and Rackers Excavating that a burn permit had to be obtained before any of the brush could be burned, because they were located within the city limits of Holts Summit. The inspector gave Rackers Excavating the telephone number for NERO and asked him to contact Ms. Abbie Stockett and start the process for obtaining a burn permit. Ms. Hopke asked Mr. Snodgrass if he was aware he needed a land disturbance permit for the construction project and Mr. Snodgrass advised me he had already obtained a permit from the department. Ms. Hopke told Mr. Snodgrass someone from NERO would be by the next time staff are in the area to offer assistance in implementing his erosion control practices. There was no sediment leaving the property at the time of the investigation. No violation of the Open Burning Restrictions at the time of the investigation. Mr. Snodgrass obtained a land disturbance permit prior to beginning the project. Technical assistance will be given to Mr. Snodgrass for implementing erosion control practices when staff are in the area.								
<b>Comp. No.</b>	NE11364	<b>Comp. Info</b>	Three piles of brush were either burning or prepared for burning at a land clearing within the city limits of New Bloomfield. One pile was less than 200 yards from a residence located at 194 Jefferson.						
NERO	6/2/2005	6/2/2005	TWEHOUSE ESCAVATING COMPA	Jefferson City	Cole	Burning	Tom Prenger	MIH	
<b>Comments</b>	Ms. Mary Hopke, an investigator with the department's NERO, met with Mr. Prenger at his construction site, which is directly west of the LL Lewis Subdivision where Twehouse Excavating is working. There was ash visible in the air at the time the inspector spoke with Mr. Prenger. Four different vehicles parked at the property had ash on the hoods. Ms. Hopke went to LL Lewis Subdivision and met with Mr. Tom Burmeister, Health & Safety Officer. air curtain destructor was being used but a large pile of brush was stacked and burning approximately six feet above the air curtain destructor. Ms. Hopke instructed Mr. Burmeister to stop burning and to lower the fire area below the air curtain destructor. Mr. Burmeister instructed workers to stop burning and to reposition the debris. Ms. Hopke told Mr. Burmeister I observed ash in the air and on vehicles at the Prenger Construction site. Mr. Burmeister went to the Prenger Construction site and was making arrangements to clean the vehicles. Ms. Hopke issued a Notice of Excessive Emissions to Twehouse Excavating for the ash leaving the property and NOV issued for violation of burn permit conditions due to the misuse of the air curtain destrctor. See report for further details.								
<b>Comp. No.</b>	NE11370	<b>Comp. Info</b>	The complainant states that overnight a subdivision has become covered with black soot from trees burning from 60 acres of land being cleared from a subdivision next door that is within the Jefferson City city limits. Houses with new siding are black with soot. Also, dust is blowing from the construction site.

NERO	6/2/2005	6/2/2005	JESSIE AND NANCY LEIBURGER	De Witt	Carroll	Asbestos	Bill Sparks, Mayor	AIS	
<b>Comments</b>	NERO staff contacted the APCP and was informed demolition notifications were submitted and approved for both sets of properties owned by Leiburgers and Wardens. NERO staff contacted Mayor Sparks and left a message on his machine with the information. Ms. Loraine Lester, a City Police Officer contacted the regional office on June 3, 2005, and informed Ms. Abbie Stockett, an investigator with the department's NERO, the building belonging to Mr. Lybarger contained asbestos had the back of the building torn. Ms. Stockett checked the files and found demolition notifications had been given for Mr. Lybarger for property located at 703 Jefferson only. The asbestos was found in property located at 705 Jefferson. Ms. Stockett contacted the APCP and found out no information had been received on 705 Jefferson. The inspector contacted Mr. Lybarger by telephone and was told the asbestos inspection did indicate asbestos was found on the roof of the building. Mr. Lybarger told me he did not intend to tear the building down. Ms. Stockett told Mr. Lybarger if he wanted to know the amount and type of asbestos found during the inspection he could sent a copy of his results to Mr. John Weber at the APCP. Ms. Stockett provided Mr. Lybarger with the telephone number. Mr. Lybarger contacted Ms. Stockett later and told her the APCP stated he only had to send his results and a demolition notification if and when he intended to tear the building down. Notifications were submitted and approved and so there was no violation.								
<b>Comp. No.</b>	NE11377	<b>Comp. Info</b>	The complainant states demolition started last week on one set of the buildings owned by Jessie and Nancy Leiburger. One wall on the backside of the building was pulled down. The complainant is concerned the approval for demolition was not obtained from the department's Air Pollution Control Program (APCP). A council meeting is scheduled for Monday night. Both owners (Leiburger and Warden) were supposed to provide copies of the demolition approval to the City, but they did not.						
NERO	6/2/2005	5/31/2005	HUEY CONSTRUCTION	Kingdom City	Callaway	Asbestos	Paul Jeffery	MGS	
<b>Comments</b>	Mr. Michael Sudholt went to North Callaway High School and was told the project will not start until after June 6, 2005. On June 16, 2005, Mr. Sudholt went to the school and spoke with Andy and Jamie Huey of Huey Construction. They told the inspector many of the tiles popped up easily after they were wet. Any that were at all difficult to remove were heated until the mastic was released. They had completed removal of the 9x9 floor tile. There was no indication of chipped or friable floor tiles among those that remained (not a part of the current contract). There appeared to be no violation of the asbestos regulations. No violations of asbestos regulations.								
<b>Comp. No.</b>	NE11363	<b>Comp. Info</b>	North Callaway High School has hired a contractor to remove 9x9 floor tile from the school. The contractor, Huey Construction is doing the removal work and is scheduled to begin this week. It is recommended the contractor have technical assistance on the proper removal methods. Huey Construction previously had asbestos issues and should be aware of the requirements.

<b>Comp. No.</b>	NE11434	<b>Comp. Info</b>	On June 10, 2005, at 8:48 p.m. the complainant reported odors from PSF Valley View as follows. The complainant stated Friday evening at 8.50 p.m. they are getting odor at his house and the winds were from the South. June 10, 2005, at 12:03 p.m., odors from PSF Valley View were reported as follows. The complainant states the odor at his house was terrible. He had to get up and shut all the windows. The winds were from the South.						
NERO	6/14/2005	6/13/2005	HICKMAN HIGH SCHOOL	Columbia	Boone	Asbestos/Particulate	Anonymous	DLK	
<b>Comments</b>	Mr Don L. Kinkhorst met with Mr. Chester Edwards and walked through the school and surrounding property. Mr. Kinkhorst noted large scale renovation is taking place at this school. Mr. Kinkhorst discovered numerous broken pieces of gray 12x12 floor tile with black mastic on the back surrounding the schools roll-off dumpster. Mr. Edwards assured the inspector that this tile tested negative for asbestos and he would provide documentation. Mr. Kinkhorst took a sample of the tile found lying around the dumpster in case no previous samples were taken. Mr. Edwards found that the floor tile in question came from areas 223 and 224 of the school. According to Mr. Edwards, the school's 1998 AHERA report identified the floor tile in areas 223 and 224 contain asbestos. Mr. Edwards believed the tile identified in 1998 had been previously abated and replaced with new tile. Mr. Edwards stated that the school districts Architect Hoener Associates, Inc. confirmed that the tile was non-ACM prior to the current abatement. Hoener Associates, Inc. could not find where this tile had been sampled so they obtained the services of Engineering Surveys and Services to sample the mastic still remaining in the areas of removal. Six samples were taken of the mastic. All mastic samples were analyzed using PLM and contain 10% Chrysotile. Upon discovering the mastic contained asbestos, Environmental Consultants, LLC conducted aggressive air monitoring and found no structures detected. Since Mr. Kinkhorst had the only sample of floor tile remaining he sent it to be analyzed using TEM. The TEM results of the floor tile are 3-5% asbestos and the mastic attached to the tile is 1-3% chrysotile. GBH Builders, Inc. from Jefferson City, MO (573-893-3633) conducted the removal while school was still in session. The amount of floor tile removed on the first floor is approximately 4,750 square feet and the amount on the second floor is approximately 4,000 square feet. Mr. Jim Ysitis, of Environmental Consultants, LLC. determined from Mr. Mike Bungart of GBH Builders, Inc. that the floor tile was removed using a mechanical chipper and no containment or other control techniques.								
<b>Comp. No.</b>	NE11430	<b>Comp. Info</b>	The complainant is reporting there is mastic and transit laying outside of Hickman High School.

<b>Comments</b>	Ms. Mary Hopke made contact at the property with the reported party Mr. Robert Schowengerdt. Mr. Schowengerdt told Ms. Hopke he was burning scrap lumber and cardboard from the construction of a home on the property. Mr. Hopke asked Mr. Schowengerdt if he had burned any of the styrofoam forms on his truck and he said he had just started the fire with paint thinner and was getting ready to start feeding the forms into the fire. Ms. Hopke told Mr. Schowengerdt burning the construction waste in violation of the State Open Burning Restrictions and asked Mr. Schowengerdt to stop burning the debris. Mr. Schowengerdt agreed to stop burning. Mr. Schowengerdt told Ms. Hopke he was not aware these type of items could not be burned. Mr. Hopke reviewed the Open Burning Restrictions with Mr. Schowengerdt and left a copy with him.								
<b>Comp. No.</b>	NE11555	<b>Comp. Info</b>	On June 28, 2005, while traveling to Macon, the complainant observed a plume of dark black smoke coming from behind a storage building on property located on the east side of Highway 63. The complainant saw a flat bed truck loaded with styrofoam blocks backed up to the fire and a gentleman standing between the truck and the fire.						
NERO	6/28/2005	6/22/2005	TRAVIS HERZING	Jefferson City	Osage	Burning	Anonymous	MIH	
<b>Comments</b>	Ms. Mary Hopke met with the reported party, Mr. Herzing at his shop. Mr. Herzing took Ms. Hopke to a parcel of land he owns southeast of his shop and showed her where he was sorting and storing assorted metals for recycling in steel 55 gallon drums. Mr. Herzing has four old vehicles parked at the fence line, he intends to either salvage or sell. Ms. Hopke discussed with Mr. Herzing the proper disposal of used oil and other fluids generated from his business, the proper disposal and storage of scrap tires, and the requirements to have freon removed properly from vehicles or appliances. Ms. Hopke also explained no waste generated from his business could be burned he will need to obtain an NPDES permit if he processed or stored more than 50 vehicles on the property within a year. Ms. Hopke told Mr. Herzing she would send him a copy of a booklet containing all the information.								
<b>Comp. No.</b>	NE11469	<b>Comp. Info</b>	The complainant states the reported party is moving vehicles onto their property and is not aware of the environmental regulations. The complainant would like for the department to contact the reported party and let him know how to properly handle fluids he drains from vehicles, scrap tires cannot be burned, and he may have to obtain a water pollution permit if he stores more than 50 vehicles on his property.						
NERO	6/29/2005	6/28/2005	MS. SAM LEATHERS	Higbee	Randolph	Burning	Anonymous	MIH	
<b>Comments</b>	Ms. Mary Hopke went to the reported party, Ms. Sam Leathers' residence but could not make contact with Ms. Leathers. There was a small area in the backyard where it appeared tree limbs had been burned. Neighbor children told Ms. Hopke that Ms. Leathers worked at Casey's General Store. Ms. Hopke went to Casey's General Store and was told Mrs. Leathers was not working but her boyfriend was out at the gas pumps getting gas. Ms. Hopke approached the gentleman and asked if he knew where she could make contact with Ms. Leathers. He stated she was at home and had chosen not to come to the door for whatever reason. Ms. hopke went back to the Leathers residence and could not make contact with Ms. Leathers. No burning being done at the time of either visit to the residence. Ms. Hopke will send Ms. Leathers a technical bulletin on open burning. Ms. Hopke observed no violation at the time of the investigation. Ms. Hopke mailed an open burning fact sheet to Ms. Leathers.								
<b>Comp. No.</b>	NE11485	<b>Comp. Info</b>	The complainant reports the burning of railroad ties and plastic behind the reported party's house.

NERO	6/29/2005	6/29/2005	JIM HOLMAN, TALT HOLMAN / JEF	Macon	Macon	Burning	NERO Staff	MIH	
<b>Comments</b> Ms. Mary Hopke went to the site and met with Mr. Jim Holman. Mr. Jim Holman told her he thought it was okay to burn brush because he burned his own tree limbs at home and was told by the city and the fire department that he could. Mr. Hopke told Mr. Jim Holman if they conducted land clearing for a commercial lot and generated debris it could not be burned within the city limits without a burn permit. Ms., Hopke also told Mr. Jim Holman if he wanted a burn permit he needs to have a ACD because he was burning near a residential neighborhood. Ms. Hopke told Mr. Jim Holman if he extinguished the fire and submit an application to the NERO she would not issue a Notice of Violation. Mr. Jim Holman stated he would send someone to the office to obtain the applications and the only way he could extinguish the fire was to have the fire department put it out. Mr. Hopke told Mr. Jim Holman that was his choice, but that he needed to be aware the smoke was traveling toward a heavily populated area, including the senior citizen housing complex. Ms. Hopke photographed the burn area and left. At 4:30 p.m. she went back to the burn site and the brush pile had been dozed to the center of the lot and had dirt piled up around it, but it was still smoldering. At 4:45 p.m. the property owner Mr. Jeff Roberts contacted the NERO and asked if there were problems at his property where Holman Construction was working. Ms. Hopke explained to the regulations to Mr. Roberts. Mr. Roberts told her Holman Construction was responsible for the removal of the brush. At 4:55 p.m. Mr. Talt Holman contacted the NERO and questioned why they could not burn the debris. Ms. Hopke explained the situation to Mr. Talt Holman. He explained he was just leaving Columbia with equipment and when he got to Macon he would instruct his dozer operator to put the fire out. Ms. Hopke told Mr. Talt Holman they could remove the brush from the property and take it to property out of the city limits that was at least 200 yards from any occupied dwelling and burn it if they wanted to. Mr. Talt Holman stated the property owner was trying to push the disposal of the brush off onto him. Mr. Talt Holman also stated they did not want to get an ACD to burn the debris on site and did not want to move it after it had started burning. Ms. Hopke told Mr. Talt Holman the final decision would be his. She asked him to contact the NERO on Thursday morning, June 30, 2005, and inform them of what he decided to do. At 7:55 a.m. on June 30, 2005, Ms. Hopke went by the burn site and soil had been piled up and around the burn pile but it was still smoldering. Rain had just started in the Macon area. On July 1, 2005, Ms Hopke drove to the property and observed a brush pile about 20 feet by 20 feet by 6 feet smoldering. Flames were at times visible from the pile. Dirt had been piled up around the edge of the pile. The smoke from the fire was blowing towards a day care located next door. A bulldozer operator stated someone in white jeep (Mary Hopke) had come by a couple days ago and had told them it was okay to let it smolder as long as it was covered with dirt. Mr. Jim Holman then stopped by. Ms Hopke explained the requirements not to conduct burning of waste from land clearing within the city limits without first obtaining a permit. She told him he failed to obtain a permit prior to setting this on fire. She recommended that they extinguish the fire. Mr. Jim Holman stated that the fire would be out by tonight and that the remaining brush would be moved out by Tuesday. He stated that he would haul the brush to a property in the country and use it for fill. The brush is mixed in with a lot of dirt. Mr. Jim Holman stated he was working on a similar project in the west side of town. On that project, the brush has been pushed out and is ready to be burned. She told Mr. Jim Holman that he needs to apply for a burn permit for that property. Ms. Hopke sent a letter of warning about burning brush within the city limits without a permit.									
<b>Comp. No.</b>	NE11501	<b>Comp. Info</b> The complainant reports Holman Construction is burning a large brush pile at Mr. Jeff Roberts' construction site. Holman Construction does not have a burn permit to burn the debris. Ash is being observed landing on vehicles and floating in the air at the NERO parking lot.

<b>Comments</b>	Mr. Greg Robertson, an inspector with the department's NERO, advised the complainant that the department no longer has the resources to conduct Underground Storage Tanks investigations. In the event of an environmental emergency the department's Environmental Emergency Response staff will respond to mitigate the situation. Mr. Robertson stated this information would be documented and placed in the file in the event the resources are restored, and the report would be forwarded to the Tanks Program in Jefferson City. Ms. Robertson forwarded the finalized EI form to Mr. Mike Martin in the department's Tanks Enforcement and Closure Unit.								
<b>Comp. No.</b>	NE11499	<b>Comp. Info</b>	The complainant reports on May 21, 2005, a building was demolished and an Underground Storage Tanks removed from the ground. The building was associated with a service station operated until the late 1960's. The person operating the service station was named Connie Daniels. In the 1970's the site was purchased by Mr. Lee Brady and the building converted into living quarters. Mr. Joe Jeff Davis purchased the site within the last few months, and demolished the structure to convert the site into a car dealership. The complainant is concerned with the manner in which the tank was removed and petroleum vapors during the project were very strong. The excavation has been backfilled and a pile of gravel is onsite.

NERO	7/6/2005	7/6/2005	CHRIS MAIN	Macon	Macon	Burning	NERO Staff	SMB	
<b>Comments</b>	Mr. Steve Boone observed smoke coming from a residential area in Macon and investigated. Mr. Boone contacted Mr. Keith March and later, Mr Chris Main at the property. The reported party cleared about five acres of trees and were disposing of them by burning. The first brush pile had just been started and they have several brush piles to burn. Mr. March stated he had obtained permission from the Macon Fire Department prior to the burning. Mr. March asked if he should put the fire out or let it burn. Mr. Boone allowed him to let the fire burn down. Mr. Boone told him he needed to obtain a permit. Mr. Main arrived and the inspector explained the requirement for an open burning permit to both Mr. Main and Mr. March. Mr. March will complete an application and submit it to the department today. Mr. March will take a measuring wheel and determine the distance to the nearest house. It appears to be greater than 200 yards. Mr. Boone sent a warning letter informing them of the requirements to obtain a permit for burning and requested they immediately cease burning until a permit can be obtained.								
<b>Comp. No.</b>	NE11521	<b>Comp. Info</b>	The complainant states land clearing is taking place within the city limits of Macon and the brush cleared from the property is being burned.

NERO	7/13/2005	7/12/2005	UNKNOWN	Jefferson City	Cole	Particulate	Mary Bezoni	MIH	
<b>Comments</b>	Ms. Mary Hopke states the climate conditions for the Columbia area on July 12, 2005, at 2:55 p.m. were winds from the North Northwest at eight miles per hour. The complainant residence is located Northwest of Edgewood, but would be located South Southeast of Country Club Estates. This information was forwarded via e-mail to Mr. Steve Feeler at the department's Air Pollution Control Program so verification could be made as to whether or not the ash was being generated from Twehouse Excavation who has been referred to the ACPC Compliance/Enforcement Section. Mr. Paul Jeffrey investigated on July 13, 2005, and stated ash was more than likely generated off South Country Club Drive and is apparent on the complainant's vehicle. The information obtained during the investigation indicates Schulte Excavation conducted burning of vegetation on July 12, 2005. File search shows Schulte Excavation has a burn permit for this area. Mr. Hopke will contact Schulte Excavation and let them know about the report received of ash on vehicles and property in the Gettisburg area. On July 14, 2005, Ms. Hopke reached Mr. Greg Schulte and confirmed he did burn on July 12, 2005, but quit adding to the fire at noon. Mr. Shulte said the fire was out by 4:00 p.m. Ms. Hopke told Mr. Schulte about the complainant's vehicle. Mr. Schulte denied the ash came from his operation. Mr. Schulte estimated the complainant's home was about 500 yards from his burn site. Ms. Hopke told Mr. Schulte that Mr. Paul Jeffrey had traced the ash back to that property. Ms. Hopke suggested Mr. Schulte contact the complainant and arrange to clean up her vehicle and property. Mr. Schulte told her he would. Please see report for further details. Letter of Warning issued to Mr.Schulte for particulate matter leaving the property. See report for further details.								
<b>Comp. No.</b>	NE11552	<b>Comp. Info</b>	The complainant states someone is burning and ash is covering the house, the car and the yard. The complainant states it is apparently coming from Country Club Estates.

**Dates Received or Inspected:** 6/1/2005 **through** 7/31/2005

<b>Region</b>	<b>Inspection Date</b>	<b>Date Received</b>	<b>Suspected Source Owner/Operator</b>	<b>City</b>	<b>County Name</b>	<b>Type of Complaint</b>	<b>Complainant</b>	<b>Inspector Initials</b>	<b>NOV</b>
NERO	7/18/2005	7/18/2005	PSF WHITETAIL	Unionville	Putnam	Odors	Melody Torrey	SMB	
<b>Comments</b> Mr. Steve Boone will conduct an on-site investigation when next in the area. No immediate on-site investigation conducted due to quickly changing weather conditions leading to wide variations in odors at specific locations and because of the one to two day advance notice required to collect air samples.									
<b>Comp. No.</b> NE11578 <b>Comp. Info</b> On July 17, 2005, at 9:54 p.m., the complainant reported odors from PSF Whitetail. "July 16, 2005, the complainants stated the odor was horrible that morning. The odor was a strong hog manure smell."									
NERO	7/18/2005	7/6/2005	SFG BACKES FEED, INC.	Loose Creek	Osage	Fugitive Dust	Earl Hake	MGS	
<b>Comments</b> Mr. Michael Sudholt found no violation of dust regulations. Some dust blew down the street, but the source could not be identified. There was no dust from the feed mill in operation.									
<b>Comp. No.</b> NE11527 <b>Comp. Info</b> The complainant reported dust from a feed store in Loose Creek.									
NERO	7/18/2005	7/11/2005	PSF WHITETAIL	Unionville	Putnam	Odors	Melody Torrey	SMB	
<b>Comments</b> Mr. Steve Boone, an inspector with the department's NERO, made no on-site investigation in response to this report due to the quickly changing variation in odors from changes in weather conditions and because of the one to two day advance notice required by the lab prior to analysis of air samples. An investigation will be scheduled during the next on-site investigation of this facility.									
<b>Comp. No.</b> NE11574 <b>Comp. Info</b> On July 10, 2005, at 9:51 p.m., the following two reports of odors from PSF Whitetail were filed. July 9, 2005, the complainants state the odor was still with them the following morning very early. It was a strong hog manure odor. No wind at the time. July 10, 2005, the complainant state the odor moved in this afternoon around 4:00 p.m. It came and went for the next hour before settling in for the rest of the day she tried working out in it for some time, but the odor finally got to her and forced her into the house. The odor is a strong hog manure smell. The wind is out of the Southeast to East Southeast.									
NERO	7/18/2005	7/12/2005	PSF GREEN HILLS	Green City	Sullivan	Odors	Rolf Christen	SMB	
<b>Comments</b> Mr. Steve Boone will conduct an on-site investigation when next in the area. No immediate on-site investigation conducted due to quickly changing weather conditions leading to wide variations in odors at specific locations and because of the one to two day advance notice required to collect air samples.									
<b>Comp. No.</b> NE11579 <b>Comp. Info</b> On July 11, 2005, at 9:18 p.m., the complainant filed the following two reports of odors from PSF Green Hills. "Gary Perkins contacted Mr. Christen a few minutes ago to report strong odors at his house. The complainant states they are getting pollution there also. It is Monday, July 11, 2005, at 9:00 p.m., the sky is clear, and the winds are very light from the North. The complainant states it must be Green Hills."									
NERO	7/20/2005	7/20/2005	CITY OF MOBERLY	Moberly	Randolph	Odors	Joanna Stoner	SMB	
<b>Comments</b> Mr. Steve Boone spoke with Ms. Mary West, City of Moberly Director of Public Utilities. Ms. West stated the odors are located at a combined sewer storm water overflow basin located on East Rollins, not on West Rollins. The water in the storm water basin has grown stagnant and is odorous as a result. The source of the odors is not located in the neighborhood of the complainant's house. Mr. Boone contacted the complainant by telephone and informed her of the location of the odors. Mr. Boone did not conduct an on-site investigation because the source of odors is not in the complainant's neighborhood.									
<b>Comp. No.</b> NE11590 <b>Comp. Info</b> The complainant heard from a friend of a report on KRES radio of odors between the 700 and 800 block of West Rollins in Moberly. That is one block from her house and she is concerned that her health problems are caused by whatever is the source of the odor. The complainant has not noticed any odors, but has heard about them on the radio.

NERO	7/21/2005	7/8/2005	CON-AGG OF MO, LLC	Columbia	Boone	Fugitive Dust	Larry Berve	DLK	
<b>Comments</b>	Mr. Don L. Kinkhorst arrived at the quarry complex and observed the property for fugitive emissions. Mr. Kinkhorst did not view any fugitive emissions from this property at this time. Next, he met with Mr. Larry Berve at his residence and observed a small amount of dust on his grill and patio furniture kept on the back patio of his home. Mr. Berve stated the dust is really bad in the mornings. Mr. Kinkhorst took photographs of the dust on the grill and patio furniture. He asked Mr. Berve how long it had been since he cleaned off the furniture and grill. Mr. Berve did not know how long it had been since he last cleaned them off but assured him it was not very long ago. Mr. Kinkhorst informed Mr. Berve that he did not observe any fugitive emissions prior to arrival at his residence. He informed Mr. Berve that without viewing emissions leaving the quarry it would be impossible to say the dust on his grill and patio furniture resulted from the quarry. Mr. Kinkhorst states there was no fugitive particulate observed leaving the quarry at the time of this investigation. Other sources of dust exist in the area so the source of the dust at Mr. Berve's property cannot be identified as coming from the quarry at this time. A follow up investigation will occur when weather conditions are favorable for transport of particulate from the quarry to Mr. Berve's property.								
<b>Comp. No.</b>	NE11529	<b>Comp. Info</b>	The complainant reported dust and dynamite from a rock quarry on Stadium Boulevard. The complainant stated it is especially bad early in the mornings.						
NERO	7/21/2005	7/18/2005	CON-AGG OF MO, LLC	Columbia	Boone	Fugitive Dust	Larry Berve	DLK

<b>Comp. No.</b>	NE11564	<b>Comp. Info</b>	The complainant stated quarry dust from the quarry on Stadium Boulevard is coating everything on his property.						
NERO	7/22/2005	7/13/2005	MORRIS CARMACK HOG FARMS	Nelson	Saline	Odors	Henry Deal	SMB	
<b>Comments</b>	Mr. Steve Boone, stated that Carmack Hog Farm is a Class 1C CAFO and is not subject to the state odor regulations for CAFOs. Mr. Boone referred the concerns about the operation of a compost and cafo waste management system to the Water Pollution Inspections Unit so an inspection can be conducted. Mr. Boone states the facility is exempt from CAFO odor regulations.								
<b>Comp. No.</b>	NE11556	<b>Comp. Info</b>	The complainant states on July 11, 2005, at midnight he had to get up and shut his windows due to the odors coming from the neighboring hog operation. The complainant stated he had to shut his windows at 1:30 a.m. on July 12, 2005, due to the odors. He states the buzzards flying around the hog farm are now becoming a nuisance to others living in the area. The complainant wants the department to conduct a full inspection on the hog farm for all aspects including the lagoon, proper disposal of carcasses, and odors. The complainant believes the State of Missouri should do their job in protecting the health of Missouri citizens and take actions to protect them, not the swine industry. The complainant does not believe anyone should have the right to operate in a manner that can adversely affect the human health and rights of others. The complainants stated he has been in contact with his State Representative and told him the same thing.

NERO	7/26/2005	7/20/2005	PSF SOMERSET	Powersville	Mercer	Odors	Conrad Eurom	SMB	
<b>Comments</b>	Mr. Steve Boone conducted an on-site investigation of odors at PSF Somerset from 7:25 a.m. to 10:20 a.m. and again from 11:15 a.m. to 12:00 p.m. Odors were detected at a 5.4:1 dilution threshold at one location outside the spreading agreement property boundaries. No odors were detected at the complainant's house. Winds were variable and rain was occurring off and on during the investigation. Mr. Boone found no violation of odor regulation during the on-site investigation.								
<b>Comp. No.</b>	NE11573	<b>Comp. Info</b>	The complainant reported a strong pig odor coming from PSF Somerset at the complainant's house on Monday evening, July 18, 2005, from 6:00 p.m. until midnight. A faint pig odor was noticed during the day on Monday. The odors were gone by Tuesday morning. The complainant states on Sunday evening they had 0.7 inch of rain.						
NERO	7/26/2005	7/25/2005	EMERY SAPP & SON'S, INC.	Columbia	Boone	Burning	Wyatt and Irvin Phillips Gradi	DLK	
<b>Comments</b>	Mr. Don L. Kinkhorst met with Mr. Scott Stucky of Emery Sapp & Son's, Inc. Mr. Stucky and Mr. Kinkhorst went to the open burning site and Mr. Kinkhorst measured the distance from the burn pit to the nearest occupied structure. The burn pit is 200 yards from the nearest occupied structure, therefore no further action is required.								
<b>Comp. No.</b>	NE11598	<b>Comp. Info</b>	The complainant reports the reported party is open burning on old Highway 63 in Columbia at a development called Copper Beach. The complainant believe the open burning is occurring within 200 yards of an apartment complex. The complainant is upset because they bid on this project with intent to use a chipper instead of open burning because they believe they could not achieve the 200 yard setbacks required for open burning. The complainant stated chipping has higher costs associated with it than does open burning and this is the reason their company lost the bid for this site.						
NERO	7/27/2005	7/26/2005	DENNIS OSER	Bunceton	Cooper	Odors	Anonymous	MIH	
<b>Comments</b>	Ms. Mary Hopke observed three areas on Round Hill Drive that had the glycerin product applied for dust control. The areas had only a faint odor and did not have any dead vegetation. Ms. Hopke observed one area on the south end of Laquer Farm Road where the glycerin product had been applied the day before. There was an odor in this area but was not offensive to her. Smiley Creek does run parallel with Laquer Farm Road but is an estimated 30-40 feet away and is protected from overspray by very dense vegetation. Ms. Hopke did not observe any dead vegetation on the road sides. Moniteau Creek monitored in two areas. Please see report for further details. Mr. Oser is being asked to submit analytical data, which indicates the contents of the glycerin product prior to approval being given to him for use of the glycerin product for dust control. Ms. Hopke issued a letter of warning to Mr. Oser and Missouri Better Bean, LLC. See report for further details.								
<b>Comp. No.</b>	NE11608	<b>Comp. Info</b>	The complainant reports the reported party is applying waste from the Bunceton Better Bean soy diesel plant on county roads for dust control. The complainant states the product is not working and has a strong odor of old lard. The product has been applied to Round Hill Drive and also on Laquer Farm Road off Route AA. The product has killed the grass on the side of the road and is being applied within 20 feet of Smiley Creek. The complainant states the area looks as though the product is fresh and has just been applied to the roadway. The complainant told regional office staff one of the owners of Bunceton Better Bean lives next to area where the product has been applied.

NERO	7/27/2005	7/27/2005	PSF VASLEY VIEW	Green City	Sullivan	Odors	Rolf Christen	SMB	
<b>Comments</b>	The complainant supplied additional information to Mr. Steve Boone about the odors as follows. The wind at the complainant house changed all the time from Southeast to South to Southwest. When the wind was more on the Southeast to South end of the spectrum, the complainant recieved odor in gusts. It was so gusty, though, the odor came and went in a matter of seconds. The complainant believe the odors were from PSF Valleyview. Mr. Boone made no on-site investigation in response to this report due to the quickly changing variation in odors from changes in weather conditions and because of the one to two day advance notice required by the lab prior to analysis of air samples. An investigation will be scheduled during the next on-site investigation of this facility.								
<b>Comp. No.</b>	NE11621	<b>Comp. Info</b>	On July 26, 2005, at 3:18 p.m., the complainant reported odors from PSF Valley View as follows. The odor was light and variable there since Sunday. The wind was gusty and the complainant could smell it every once in a while.						
NERO	7/28/2005	7/28/2005	DUANE DIXON	Mount Leonard	Saline	Burning	Saline County Sheriffs Dept	DLK	
<b>Comments</b>	Mr Don L. Kinkhorst stated Mr. Dixon burned demolition debris according to Saline County Sheriff's Department's Offense/Incident Report, Complaint #050584. Mr. Kinkhorst issued Notice of Violation #0980NE to Mr. Duane Dixon for violation of the state regulation 10 CSR 10-3.030 Open Burning Restrictions. Mr. Dixon burned the demolition materials after Deputy O'Neal warned Mr. Dixon not to open burn. Mr. Kinkhorst recommends the department seek penalties against Mr. Dixon for this violation.								
<b>Comp. No.</b>	NE11619	<b>Comp. Info</b>	The complainant states the reported party is open burning demolition debris on property currently in probate located two blocks West of Highway 127 on 2nd Street in Mt. Leonard.

<b>Comments</b>	Mr. Walter Shull found fugitive dust is being generated by truck traffic on the haul road of the excavation property. The reported party immediately contacted the ontractor to provide water spray for dust control during the investigation. The contractor initiated water spray which suppressed all fugitive dust. The contractor agreed to maintain dust suppression with water spray during the remainder of the excavation. Mr. Shull did not issue a violation since the problem was immediately corrected. However, the investigator advised the reported party that should fugitive dust become a problem, a NOV may be issued for the next occurrence.								
<b>Comp. No.</b>	SE5256	<b>Comp. Info</b>	The complainant states her neighbor is selling truckloads of clay dirt off of four to five acres near her property. The clay soil is blowing and drifting off of the earth moving equipment and trucks and landing on her property (windows, house, yard, etc.). The complainant can't go outside because of all the dust.						
SERO	6/17/2005	6/16/2005	CEDAR LAKE DEVELOPMENT (?)	Bonne Terre	St. Francois	Burning	Anonymous	AW	
<b>Comments</b>	Mr. Albert Wampler spoke with Mr. Chris Jordan who owns the log where the burning took place. Mr. Wampler observed the remains of two brush piles, a piece of metal siding and a lot of stumps. Mr. Wampler did not see any vinyl pieces or trash. Mr. Jordan stated he bought the property and burned the brush piles, which were from clearing the roadway. Mr. Jordan stated if there is anything else besides brush in the piles, it was incorporated into the pile before he acquired the property. Mr. Jordan stated he did not burn other debris. Mr. Wampler stated it appears some waste could have been previously placed in piles. Mr. Jordan burned the piles in effort to clean up the lot. No intentional burning was found. Mr. Jordan does not want neighbors upset and stated he will try not to burn the remaining stumps. Mr. Wampler cited no violations.								
<b>Comp. No.</b>	SE5341	<b>Comp. Info</b>	The complainant states someone is burning things that make your eyes water and throat burn. The complainant believes it is coming from the Cedar Lake Development.

<b>Comments</b>	Mr. Albert Wampler noted Southridge Subdivision has newly built homes. Construction workers have been hauling soil and sand to the new sites. Mr. Wampler stated the streets are already paved. Dust could have been blowing from the trucks as they were unloading piles of sand and soil. Mr. Wampler did not observe dust during the investigation. Fronabarger trucks were not on the site at the time. Mr. Wampler contacted Fronabarger by telephone and left messages concerning the complaint. Mr. Wampler observed no violations.								
<b>Comp. No.</b>	SE5373	<b>Comp. Info</b>	The complainant states the reported party is hauling dirt and sand into a new subdivision construction site. The dust is so unbearable they are unable to breathe outside and the houses in the immediate area are covered with dirt and sand.						
SERO	7/12/2005	7/12/2005	TONY MERRITT	Park Hills	St. Francois	Burning	Anonymous	AW	
<b>Comments</b>	Mr. Albert Wampler, spoke with Mr. Tony Merritt, the landowner and the reported party. The materials burned was household trash, old lumber from a fence and some construction waste he had generated at his home location. Mr. Merritt said he had not burned tires but used some old used oil to start the fire. Mr. Merritt burned the material in an old ditch adjacent to his neighbors with whom he has an ongoing feud. He bought the property, and when surveyed the property line, it went throughout the center of the neighbors trailer (mobile home). So he then fenced the land. This upset his neighbors and he has been plagued by them every since. Mr. Merritt was instructed not to use motor oil to start fires and since he does some construction off-site, he was instructed not to bring any waste material home to burn. He did have a few waste tires on site, but said he would not burn those either. No remnants of burnt tire was in the burn area. Since he had been only burning waste generated at his residence, Mr. Wampler cited no violation.								
<b>Comp. No.</b>	SE5432	<b>Comp. Info</b>	The complainant states the reported party is dumping construction materials in and along a creek on the reported party's property. When the pile gets big, he then puts tires on it and sets it on fire. The complainant states he is burning today, July 12, 2005.

SERO	7/20/2005	7/13/2005	MR. SPITZMILLER	Ironton	Iron	Burning	Mardie Martin	AW	
<b>Comments</b>	Mr.Albert Wampler stated the trailer court is the site of a lead clean up by the Doe Run Company. The site is lead contaminated due to a loading operation at the railroad. Trees were bulldozed and burned surrounding the court. The complainant stated many old tires were in this area and the contractor also had burned them. Burning took place sometime in April. The contractor stated they had a burn permit, but no evidence of the permit was not found at the SERO. The complainant is unhappy about the way her yard was left after the soil removal. She stated her mobile home was lifted up and when final resetting was done the process had warped her home so bad that doors did not close or fit properly. Mr. Wampler contacted Mr. Dennis Murphy of the Doe Run Company. He was aware of the cleanup but did not visit the site. He will contact the parties and have them follow up on the issue. The trailer park property is owned by Mr. Walter Spitzmiller. Mr. Wampler contacted Mr. Spitzmiller, he was not aware of any problems until he was contacted by our office. The complainant stated no septic was on site except one on the corner trailer, and raw sewage was running out from the "skirt drains." They stated EPA could not take soil samples due to marshy area of sewage. Area can not drain due to new road construction and smashed pipe. Mr. Spitzmiller stated that all his trailers had septic and he had them pumped out. Seven trailers and one duplex is located on property. One additional house just off property. Five trailers are owned by Spitzmiller. Mr. Spitzmiller stated the drain field could be damaged and he will go look at the property. Final conclusion of this office was to notify Doe Run Company and Mr. Spitzmiller. Water Pollution will send complaint to DOH for follow up on sewage. Since burning occurred in April, no violation was cited for this issue. It appears a fued is ongoing and the complainant wants reimbursed for damage she said was a result of contractor and Doe Run. She said they are burning hurt cars and trailer.								
<b>Comp. No.</b>	SE5437	<b>Comp. Info</b>	The complainant states the reported party is burning tires and trees and have burning sometimes for two straight months.

SLRO	7/19/2005	6/21/2005	ORF CONSTRUCTION	Bridgeton	Warren	Burning	Anonymous	KJA	
<b>Comments</b>	Mr. Kevin Arnold, an inspector with the department's SLRO, stated he is unable to prove Orf Construction is responsible for burning. Since Mr. Arnold is unable to contact the complainant for additional information no further action is necessary at this time.								
<b>Comp. No.</b>	SL032136	<b>Comp. Info</b>	The complainant believes Orf Construction is allegedly taking railroad ties from off-site and burning them on a piece of property. The complainant is concerned about the health effects of the smoke. The burn site is on a piece of property in front of 2431 Highway D in Marthasville, Missouri. Recently as many as 50 railroad ties have been dumped on site. Orf Construction is listed at 4317 Bridgeton Industrial Drive in Bridgeton, MO. The telephone number is (314) 298-0770. The location of the property is 2431/2445 Highway D, in Marthasville, MO 63357.						
SLRO	7/21/2005	7/18/2005	CENIMARK ROOFING	St. Louis	Franklin	Asbestos	Anonymous	PJD	2426S
<b>Comments</b>	Mr. Patrick Dwyer, an inspector with the department's SLRO, found no violations of the MO Air Conservation COMM Regulations was noted as pertaining to the roofing project. However, the facility did demolish or disassemble a warehouse without notifying the Department prior to the demolition. No roofing activity was ongoing at the time of the investigation. Facility representative included Mr. Ted Meyer, Plant Manager, Ms. Debbie Obermark, Environmental Manager, and Mr. Harold Rasch, and Mr. Mike Thornton, Maintenance Supervisor. Facility representative indicated to Mr. Dwyer that Cenimark was using a hydro cutter, which sprays water as it cuts. On July 26, 2005, at 8:35, Mr. Rob Dennis stated Cenimark was using a hydra cutter on the top section of the roof (NOV - asbestos) and was using manual methods and rhino equipment as asbestos part. On-site investigation revealed three solid waste solutions dumpsters, 1-888-679-2783. Mr. Dwyer stated that one was sloppily lined with plastic and had one asbestos sign posted and contained a felt/asphalt like material. The other two dumpsters were not lined, did not have asbestos signage but contained a different type of roofing material, fiberglass like stuff and 1.5 inch thick square sheet material. Facility representatives stated they had a 100,000 square foot roof and were currently removing a 31,000 square foot section with a third section to be replaced next year. Waste manifests were provided to demonstrate wastes were properly disposed.								
<b>Comp. No.</b>	SL032158	<b>Comp. Info</b>	The complainant states that Cenimark is conducting a roofing job at Smurfit - Stone in Pacific, Missouri, and is using a power cutter on an asbestos roof. They are also throwing general demolition waste in with the asbestos waste and improperly disposing of such waste. The complainant alleges that Zoran Prokavic is to be the on-site supervisor. Four days are left on the roofing project. The location of the problem is at Smurfit-Stone, 1101 South Denton Road, Pacific, MO 63069, Phone number is (636) 257-1433.						
SLRO	7/26/2005	7/22/2005	21 AUTO SALVAGE - - JAMES CON	Imperial	Jefferson	Asbestos	Anonymous	PJD	
<b>Comments</b>	Mr. Patrick Dwyer, an inspector with the department's SLRO, state that no further action was necessary at this time.								
<b>Comp. No.</b>	SL032159	<b>Comp. Info</b>	The complainant states that Charlie's Junkyard near Otto, MO at 4700-4800 Old Highway 21 is tearing down a building associated with the junkyard. The building has asbestos siding and they are burning it on-site.

SWRO	6/6/2005	5/16/2005	UNKNOWN	Hollister	Taney	Burning/Land Disturbance	Trent Bowers, City of Holliste	DL	
<b>Comments</b>	Mr. Dan Leyland observed an area of 37 or more acres as referenced in the complaint. No burning occurred during the day of the investigation. Basically, the reported party cleaned the slide slope and top to Cedar Glade. Cedar brush piles and brush remain. There were no erosion control measures taken such as silt fences, sed ponds, etc. However, grass lined swales and brush piles will help keep erosion reduced during this initial stage of development. The department needs to find the owner and determine if the reported party obtained a permit.

<b>Comments</b>	On June 20, 2005, Ms. Camille Dobler arrived in Carthage at 3:48 p.m. Ms. Dobler reports the wind was predominantly out of the North at five mph, but it occasionally switched and came out of the East Northeast. Ms. Dobler began driving by the street to the South of the courthouse and worked her way up and down the East-West street all the way to Central Street. Ms. Dobler could pick up a faint odor at Central Street, but she could not make a determination of what type of odor it was, or which direction it was coming from. Ms. Dobler then continued working her way into the bottoms traveling on Vine, Eldorado and Claxton Street. She returned to the North end of Main Street parked, and then walked the length of the levee. She could not pick up a distinctive odor from RES. Ms. Dobler then drove around checking storm water out falls. There was no flow except for the spring at ADM, which was clear. There was still feed spilled on the railway Northeast of the ADM facility. Also, the drain at Schriever continues to be stained from oil, although there was no flow at the time of her surveillance. RES trucks were parked well behind the staging line and all trailers were securely tarped.								
<b>Comp. No.</b>	SW6935	<b>Comp. Info</b>	The omplainant noticed an odor while at Wal-Mart on June 15, 2005, about 7:00 p.m.

<b>Comments</b>	Ms. Camille Dobler could not detect any odors from Dairy Farms of America with her nose. Ms. Dobler states there were some slight odors from the Monett Treatment.								
<b>Comp. No.</b>	SW6942	<b>Comp. Info</b>	The complainant reports odors from the dairy plant, especially on weekends.						
SWRO	6/21/2005	6/21/2005	RES	Carthage	Jasper	Odors	Teresa Spruce	CCD	
<b>Comments</b>	On June 21, 2005, Ms. Camille Dobler arrived in Carthage at 9:01 a.m. The wind was out of the Northwest, West and Southwest, during her surveillance. The wind speed varied from four mph to 12 mph. Ms. Dobler first drove North on Garrison to Kendricktown and then turned east on V Highway. When Ms. Dobler reached Highway 96, she went South. Between the Spring River bridge the next bridge South, she picked up a slight sweet burning odor at 9:20 a.m. It was very faint and was not determined on the scentometer. Ms. Dobler then continued South and turned West on Vine Street. When she reached the South end of levee, Ms. Dobler got out with the scentometer to her nose and began walking North. When she walked slightly Southeast of the RES facility, she got a detection of 7:1 through the scentometer. The detection occurred at 9:23 a.m. at the following location on the levee: N37.18349 W 094.30597. Ms. Dobler took the scentometer down and continued walking North, passed the tree line and had a clear view of the facility. Looking back down the levee to where she got the detection she could see she was lined up with the thermal oxidizer and the scrubber emissions. There was also a roll-off containing the mineral by-product being loaded onto a truck, and it was partially elevated on one end. Ms. Dobler saw an employee scraping more mineral by-product (not the roll-off) and this odor was very strong. Ms. Dobler then left the area and drove around the streets South of RES and East of the square. Ms. Dobler returned to the levee at 9:57 a.m. she could not get a detection with the scentometer. When Ms. Dobler removed the scentometer, she could occasionally get a faint smell of odor from the facility. Ms. Dobler did not see any emissions from the Thermal Ozidizer, and there were no trucks loading out. There was one truck backed up to the receiving room that appeared to be loaded, however, the trailer was securely tarped so she was unable to confirm if it was waiting to unload, or had already been unloaded. The receiving room overhead was closed. Ms. Dobler then left the levee and went to check the storm water out falls. She still observed grain on the railroad between the ADM facility and the ConAgra parking lot. Ms. Dobler confirmed there were no changes in the storm water drains.								
<b>Comp. No.</b>	SW6950	<b>Comp. Info</b>	The complainant reports a smell from a malfunctioning valve duration over one hour and 25 minutes. Please see the attached e-mail.

There was one truck backed up to the receiving room that appeared to be loaded, however, the trailer was securely tarped so she was unable to confirm if it was waiting to unload, or had already been unloaded. The receiving room overhead was closed. Ms. Dobler then left the levee and went to check the storm water out falls. She still observed grain on the railroad between the ADM facility and the ConAgra parking lot. Ms. Dobler confirmed there were no changes in the storm water drains.								
<b>Comp. No.</b>	SW6960	<b>Comp. Info</b>	The complainant reports an odor like burned cooking oil at approximately 6:30 a.m. The complainant states the odor was so strong it was overwhelming.

<b>Comments</b>	On June 22, 2005, Ms. Camille Dobler arrived in Carthage at 9:00 a.m. to conduct sampling at set locations along Spring River. The first two samples she collected were down stream of the bottoms at the Jackpine Bridge and at the Civil War Road Bridge. Ms. Dobler then went East to cut across to Highway 571 and turned South. She turned East on Vine Street and entered in Carthage Industrial Bottoms area. As she went North on Main Street, Ms. Dobler did not pick up any odors from ConAgra. She drove to the sampling location behind Schrieber. Next to the lift station she picked up an odor with her nose and it smelled like rotting garbage. Ms. Dobler could only smell the odor on the railroad tracks between Schrieber and the building North of there. It was not an odor she had previously associated with Schrieber or any other facility in the area. When she got to the lift station, Ms. Dobler could smell a slight wastewater type odor. She then collected a sample from the Spring on ADM property. After collecting her last sample above the Industrial Bottoms area, Ms. Dobler returned and walked the levee. I could not detect any processing odors with her nose from any of the industries in the area. The air was swirling in the bottoms when she arrived, and was still swirling when she left the area at 11:15 a.m.							
<b>Comp. No.</b>	SW6963	<b>Comp. Info</b>	The complainant reports an odor.

<b>Comments</b>	Mr. Dan Leyland visited the treatment plant on June 22, 2005. Odors were present in area of flow equalizer. The operator could possibly increase purging frequency to insure wastewater in the wet well does not go septic. Also, may need dedicated blower/compressor for flow equalizer. The color of effluent was not good. Perhaps from chemicals used in RV toilets. A sample was collected and results are pending. Campground operator is Mr. Buster Raglin.							
<b>Comp. No.</b>	SW6847	<b>Comp. Info</b>	The complainant reports a wretched odor coming from aeration lagoon.

<b>Comp. No.</b>	SW7075	<b>Comp. Info</b>	The complainant is reporting a very bad odor started last night on July 13, 2005, at approximately 7:30 p.m. it was initially off and on but by 8:30 p.m. it was so strong he couldn't go outside. This morning the complainant could smell the odor on his way to work and the building where he works is saturated with the smell. His home address is 1109 South Main, exactly one mile South of RES. His office is at 100 South Main, which is four blocks from RES. The complainant stated the odor got stronger as he approached the square. The complainant descrided the odor like that of a dead or rotting rat. A different odor then he smelled in weeks past when it would smell like something was burning.

<b>Comp. No.</b> SW7098 <b>Comp. Info</b> The complainant wants to file a complaint for yesterday, July 13, 2005, for odor problems in Carthage. The complainant stated the odor is worse than rotting guts, it is indescribable. Her and her husband noticed it at 6:30 a.m. and also at 7:00 p.m. yesterday. She could not say if the odor is currently bad because she is housebound and unable to get out on her own. The complainant stated she is on oxygen and on her way to the doctor she had to sit in the car yesterday to catch her breath after being outside with the smell. She stated they inquired about an equity loan to buy neighboring property and the bank asked if odor problem had been corrected and didn't want to handle her loan with ongoing problems.

<b>Comments</b>	Mr. David Allison documented heavy odors in the town this morning. Mr. Allison obtained two detections from RES at approximately 10:00 a.m. This information was relayed to Mr. Don Sanders with RES and Mr. Allison will issue an NOEE. This information was relayed to the complainant via the telephone and he requested Mr. Allison stop by his residence to speak with him further.								
<b>Comp. No.</b>	SW7192	<b>Comp. Info</b>	The complainant reported intense odors beginning at approximately 10:00 p.m. last night when the complainant opened his windows due to the rain/cold front. There have been heavy odors all evening and through the morning at his residence.						
SWRO	7/27/2005	7/27/2005	RES	Carthage	Jasper	Odors	Daniel Comer	DWA	
<b>Comments</b>	Mr. David Allison detected odors in the town this morning. Mr. Allison documented an exceedance of the odor regulations by obtaining two detections at approximately 10:00 a.m. Mr. Allen relayed this information to Mr. Don Sanders with RES. The complainant was informed of this information and the findings by telephone on this date. The complainant requested no further follow-up in regards to this complaint.								
<b>Comp. No.</b>	SW7191	<b>Comp. Info</b>	The complainant is reporting intense odors from RES. The complainant began to notice it at approximately 10:00 p.m. last night and continuing through today.						
SWRO	7/27/2005	7/27/2005	RES	Carthage	Jasper	Odors	Max McKnight	DWA	
<b>Comments</b>	Mr. David Allison detected odors at approximately 10:00 a.m. North of the RES facility. Mr. Allison obtained two detections and notified the facility they would receive an NOEE. Mr. Asslson relayed his information was relayed to the complainant via e-mail.								
<b>Comp. No.</b>	SW7189	<b>Comp. Info</b>	The complainant reported (through an e-mail) a noticeable odor this morning in Carthage first at 7:30 a.m. and it continues to grow worse.						
SWRO	7/27/2005	7/14/2005	SHARON KAMRUD	Walnut Shade	Taney	Burning/Other	Anonymous	GLE	
<b>Comments</b>	Ms. Glennis Evans states the reported party is not a commercial garage and she found no fluids or staining on the ground as noted. A Jeep Cherokee had been burned at one time. Mrs. Sharon Kamrud stated her husband did burn household trash inside the jeep. Mrs. Kamrud stated they are in the process of moving. Ms. Evans advised the reported party that no burning of trade waste is allowed but they can burn household trash only. Mrs. Kamrud stated they would be hauling off any other types of trash during the move. Ms. Evans noted no violations.								
<b>Comp. No.</b>	SW7115	<b>Comp. Info</b>	The complainant is reporting there is fluids leaking and the reported party is burning car seats and car parts.						
SWRO	7/27/2005	7/27/2005	RES	Carthage	Jasper	Odors	Jan Rush	DWA	
<b>Comments</b>	Mr. David Allison detected odors in the town this morning. Mr. Allison documented an exceedance of the odor regulations by obtaining two detections at approximately 10:00 a.m. Mr. Allison relayed this information to Mr. Don Sanders, of RES and the complainant of this information and findings by telephone on this date. The complainant requested no further follow-up in regards to this complaint.								
<b>Comp. No.</b>	SW7190	<b>Comp. Info</b>	The complainant is reporting foul odors from RES when arriving at work this morning.

# **RULE AND SIP AGENDA**

**August 25, 2005**  
**Jefferson City, MO**

## **ACTIONS FOR PUBLIC HEARING:**

(None Scheduled)

## **ACTIONS TO BE VOTED ON:**

- \* 10 CSR 10-1.030 (new rule) Air Conservation Commission Appeals and Requests for Hearings

This proposed rule contains all procedural regulations for all contested cases heard by the commission or assigned to a hearing officer by the commission. The rule is a product of the Commissioner's Core Workgroup that was established to develop and recommend uniform policies and procedures to the state's environmental commissions for the conducting business on contested cases in a manner that promotes accessibility, transparency, predictability, consistency, and fairness to all affected parties.

- \* 10 CSR 10-6.110 (amendment) Submission of Emission Data, Emission Fees and Process Information

This proposed amendment will establish the emission fee for Missouri facilities as required annually by 643.070 and 643.079, RSMo. The air emission fee for calendar year 2005 is proposed to be increased from \$33.00 to \$35.50 per ton of regulated air pollutant. Also, this proposed amendment will change the fee payment and Emissions Inventory Questionnaire submission date from April 1 to June 1 each year for United States Department of Labor Standard Industrial Classification 4911 Electric Services. All other United States Department of Labor Standard Industrial Classifications will continue to have the April 1 submission date each year.

**September 29, 2005**  
**Kansas City, MO**

### **ACTIONS FOR PUBLIC HEARING**

- \* 10 CSR 10-6.010 (amendment) Ambient Air Quality Standards

This proposed amendment will adopt the new 8-Hour Ozone and Particulate Matter 2.5 Micron National Ambient Air Quality Standards finalized on July 18, 1997 and mandated under the Clean Air Act into the ambient air quality standards table. The Methods and Concentration columns in this table have also been switched for rule clarity.

- \* 10 CSR 10-6.020 (amendment) Definitions and Common Reference Tables

This proposed amendment will add definition for PM2.5 terminology related to particulate matter emissions and total suspended particulate matter will be clarified and technical titles to the hazardous air pollutants listed in the common reference tables will be corrected. These new definitions and updates are necessary for performing emissions sampling and calculations necessary for the enforcement of air pollution control regulations throughout Missouri.

- \* 10 CSR 10-6.030 (amendment) Sampling Methods for Air Pollution Sources

This proposed amendment will update adopted Federal reference methods for the new PM2.5 Ambient Air Quality Standards finalized on July 18, 1997 and mandated under the Clean Air Act. These methods are for performing emissions sampling necessary to determine compliance status for these pollutants throughout Missouri.

- \* 10 CSR 10-6.040 (amendment) Reference Methods

This proposed amendment will update Federal reference methods for the new 8-hour ozone and PM2.5 Ambient Air Quality Standards finalized on July 18, 1997 and mandated under the Clean Air Act. These are methods for calculations necessary to determine compliance status for these pollutants in areas throughout Missouri.

## **Title 10 - DEPARTMENT OF NATURAL RESOURCES**

### **Division 10 - Air Conservation Commission**

#### **Chapter 1 - Organization**

#### **ORDER OF RULEMAKING**

By the authority vested in the Missouri Air Conservation Commission under section 643.050, RSMo 2000, the commission adopts a rule as follows:

10 CSR 10-1.030 is adopted.

A notice of proposed rulemaking containing the text of the proposed rule was published in the *Missouri Register* on June 15, 2005 (30 MoReg 1332-1336). Those sections with changes are reprinted here. This proposed rule becomes effective thirty (30) days after publication in the *Code of State Regulations*.

**SUMMARY OF COMMENTS:** The Missouri Department of Natural Resources' Air Pollution Control Program received comments from the Attorney General of Missouri, Regulatory Environmental Group for Missouri, Washington University in St. Louis, and the Missouri Ag Industries Council, Inc. The comments were generally supportive of the proposed rule, however the recently signed House Bill 824 that transfers the responsibilities for conducting hearings to the Administrative Hearing Commission required revisions to the text and elimination of many sections of the proposed rule.

**COMMENT:** The Attorney General of Missouri comments that the proposed rule be modified to be consistent with House Bill 824. The new statute, effective this August 28, transfers responsibilities for conducting hearings to the Administrative Hearing Commission (AHC), while preserving the Air Conservation Commission's authority to make final decisions, with certain limitations. As proposed, some provisions of this rule will conflict with House Bill 824 and most provisions are no longer needed. But this commission should still adopt provisions covering how it will handle an appeal after the AHC has performed its duties. This is found in subsection (4)(D). That is the portion of the rule that discusses what happens after a recommendation is returned to the commission. In a phone call with the general counsel of the Missouri Department of Natural Resources it was suggested that the commission withdraw or hold this rule in abeyance until the Commissioners Core Workgroup can reconvene and discuss the matter further. Sections (1) – (4) would need to be modified as explained in written testimony provided to the commission. Sections (5) – (21) should be deleted.

**RESPONSE AND EXPLANATION OF CHANGE:** The department's Air Pollution Control Program recognizes the significant impact that House Bill 824 has on the proposed rule. While the purpose of the proposed rule will be reduced due to the authority of the AHC the department's Air Pollution Control Program believes that the need for this rule still exists. The suggested changes to the proposed rule presented by the Attorney General's Office have been made to make the rule consistent with House Bill 824.

COMMENT: Regulatory Environmental Group for Missouri (REGFORM) comments that they are pleased to see this proposal come before the commission. The proposal contains many of the provisions asked for by our group with the Commissioners Core Workgroup. Our group sees the use of the AHC as a positive. It addresses our previous concerns about the frustration of the commissioners in handling formal hearings due to lack of legal training and a timeliness issue of scheduling and hearing appeals. The use of the AHC will also result in a more reliable record of decisions made and prevent any potential conflict of interest.

RESPONSE: The department's Air Pollution Control Program agrees that the proposed rule is consistent with the intent of the Commissioners Core Workgroup and addresses REGFORMs concerns. Therefore, no changes were made to the rule as a result of this comment.

COMMENT: Washington University School of Law provided general comments that the rule makes no provision for publication of final decisions of the commissions. Publishing the decisions would assist others in predicting the commission's decision on other appeals. The rule does not generally incorporate the Missouri Rules of Civil Procedure/Evidence where otherwise silent. The rule does not provide a specific procedure for appeals of commission decisions. Specific comments are as follows: section (3) should not allow a commissioner to hear an appeal due to potential bias or select a hearing officer; section (6) we favor of making proceedings accessible to persons or entities that cannot afford a lawyer; section (8) should clarify that discovery filings need not be filed, except as provided in the separate discovery rule; section (11) the rule should incorporate the service rule and standard for pleadings and motions from the Missouri Rules of Civil Procedure; section (14) concerning discovery should mirror the Missouri Rules of Civil Procedure; section (19) on hearings should require at least 60 days notice of a hearing on merits and not automatically require the petitioner to present evidence first; and section (21) should mirror the Missouri Rules of Civil Procedure and allow fees and expenses to be sought through motion.

RESPONSE AND EXPLANATION OF CHANGE: The suggested changes to sections (6), (8), (11), (14), (19) and (21) are no longer necessary because the new statute resulting from House Bill 824 transfers responsibilities for conducting hearings to the AHC. As a result, this proposed rule will not be able to impose requirements beyond what the AHC currently practices. However, the revised language in section (3) considered the suggested changes made in this comment as well as other comments received on this rulemaking.

COMMENT: Missouri Ag Industries Council, Inc. (Mo-Ag) comments that the Missouri General Assembly has enacted and the Governor has signed House Bill 824. This new law refers all environmental appeals to the AHC for fact finding and recommended decisions. In many respects, this new law has obviated the need for many of these proposed regulations. Consequently, Mo-Ag recommends that the Core Commissioner's Workgroup reconvene and make a new recommendation on proposed procedural rules for appeals in the post-HB 824 era. Mo-Ag would further recommend that the commission withdraw this proposed rule pending receipt of recommendation from the workgroup. Sections (3) and (4) would need to be revised to reflect the AHC appointment as hearing officer. Mo-Ag objects to section (6) that allows any individual to file an initial pleading. A lawyer should be required. Section (7) needs to be revised to further define examples that require a notice of institution of the case. It should also have a notification feature on third-party appeals. Section (7) should also provide direction on how to caption an appeal and when an answer to the writing is required. Section (9) needs to be revised to eliminate the term presiding officer and replace with AHC and clarify whether

duplicate filings must be made with the Air Commission and the AHC. Section (14) needs to place limitations on the discovery process to prohibit burdensome and inappropriate discovery requests. Section (15) should add an additional sanction of dismissal of the appeal. Section (16) should have a provision that would provide an incentive for parties to stipulate to the facts allowing motions for summary judgement. Subsection (19)(C) should be changed so that hearings not be conducted in less than thirty days notice instead of ten. It should also freely grant continuances if both parties' request a continuance or one party cannot show prejudice if the matter is continued. The rule should also require the AHC to provide a copy of its proposed decision to all parties of record in addition to the Air Commission.

**RESPONSE AND EXPLANATION OF CHANGE:** The suggested changes to sections (6), (7), (9), (14), (15), (16) and (19) are no longer necessary because the new statute resulting from House Bill 824 transfers responsibilities for conducting hearings to the AHC. As a result, this proposed rule will not be able to impose requirements beyond what the AHC currently practices. However, the revised language in sections (3) and (4) considered the suggested changes made in this comment as well as other comments received on this rulemaking.

## **10 CSR 10-1.030 Air Conservation Commission Appeals and Requests for Hearings**

*PURPOSE: This rule contains procedural regulations for all contested cases before the commission.*

- (1) Subject. This rule contains procedural regulations for all contested cases before the commission.
- (2) Definitions. As used in this rule, the following terms mean:
  - (A) Commission—The Missouri Air Conservation Commission;
  - (B) Department—The Department of Natural Resources, which includes the director thereof, or the person or division or program within the department delegated the authority to render the decision, order, determination, finding, or other action that is subject to review by the commission;
  - (C) Hearing—Any presentation to, or consideration by the hearing officer of evidence or argument on a petition seeking the commission's review of an action by the department;
  - (D) Hearing officer—Administrative Hearing Commission;
  - (E) Person—An individual, partnership, copartnership, firm, company, public or private corporation, association, joint stock company, trust, estate, political subdivision or any agency, board, department or bureau of the state or federal government or any other legal entity whatever, which is recognized by law as the subject of rights and duties;
- (3) Filing an Appeal or Requesting a Hearing.
  - (A) Any person adversely affected by a decision of the Department or otherwise entitled to ask for a hearing may appeal to have the matter heard by filing a petition with the Administrative Hearing Commission within thirty (30) days after the date the decision was mailed or the date it was delivered, whichever date was earlier.

- (B) A petition sent by registered mail or certified mail will be deemed filed on the date it is mailed. If it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the Administrative Hearing Commission.
- (4) Procedures.
- (A) The hearing shall be conducted in accordance with the provisions of chapter 536, RSMo, and the regulations of the Administrative Hearing Commission promulgated thereunder.
  - (B) Upon receipt of the hearing officer's recommendation and the record in the case, the commission shall—
    1. Distribute the hearing officer's recommendation to the parties or their counsel;
    2. Allow the parties or their counsel an opportunity to submit written arguments regarding the recommendation;
    3. Allow the parties or their counsel an opportunity to present oral arguments before the commission makes the final determination;
    4. Complete its review of the record and deliberations as soon as practicable;
    5. Deliberate and vote upon a final, written determination during an open meeting, except that the commission may confer with its counsel in closed session with respect to legal questions;
    6. Issue its final, written determination as soon as practicable, including findings of fact and conclusions of law. The decision of the commission shall be based only on the facts and evidence in the record; and
    7. The commission may adopt the recommended decision of the hearing officer as its final decision. The commission may change a finding of fact or conclusion of law made by the hearing officer, or may vacate or modify the recommended decision, only if the commission states in writing the specific reason for a change.

**COMMENTS AND RESPONSES ON**

**PROPOSED AMENDMENT**

**10 CSR 10-6.110**

**SUBMISSION OF EMISSION DATA, EMISSION FEES AND PROCESS  
INFORMATION**

**AND**

**RECOMMENDATION FOR ADOPTION**

On July 21, 2005, the Missouri Air Conservation Commission held a public hearing concerning the proposed amendment to 10 CSR 10-6.110 Submission of Emission Data, Emission Fees and Process Information. The following is a summary of comments received and the Missouri Department of Natural Resources' Air Pollution Control Program corresponding responses. Any changes to the proposed amendment are identified in the responses to the comments.

The Missouri Department of Natural Resources' Air Pollution Control Program recommends the commission adopt the rule action as proposed.

*NOTE 1 - Legend for rule actions to be voted on is as follows:*

- \* *Shaded Text - Rule sections or subsections unchanged from Public Hearing. This text is only for reference.*
- \* *Unshaded Text - Rule sections or subsections that are changed from the proposed text presented at the Public Hearing, as a result of comments received during the public comment period.*

*NOTE 2 - All unshaded text below this line will be printed in the Missouri Register.*

---

**Title 10 - DEPARTMENT OF  
NATURAL RESOURCES**

**Division 10 - Air Conservation Commission**

**Chapter 6 - Air Quality Standards, Definitions, Sampling and Reference Methods and Air  
Pollution Control Regulations for the Entire State of Missouri**

**ORDER OF RULEMAKING**

By the authority vested in the Missouri Air Conservation Commission under section 643.050, RSMo 2000, the commission amends a rule as follows:

**10 CSR 10-6.110 Submission of Emission Data, Emission Fees and Process Information  
is amended.**

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on June 15, 2005 (30 MoReg 1336-1344). No changes have been made in the text of the proposed amendment, so it is not reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

**SUMMARY OF COMMENTS:** The Missouri Department of Natural Resources' Air Pollution Control Program received comments on the proposed rule amendment from thirteen (13) sources: Associated Electric Cooperative, City of St. Louis Department of Health, City Utilities, Empire District Electric Company, Hercules Incorporated, Kansas City Health Department, Laclede Gas Company, Missouri Ag Industries Council, Inc., OsageSolutions, L.L.C., Regulatory Environmental Group for Missouri (REGFORM), St. Louis County Health Department, Springfield-Greene County Health Department Air Quality Control Program, and U.S Environmental Protection Agency (EPA).

REGFORM provided both oral and written testimony relative to the proposed amendment of the emissions fee rule. Hercules Incorporated, Laclede Gas Company, and Missouri Ag Industries Council, Inc. stated their support of REGFORM's testimony given at the Missouri Air Conservation Commission (MACC) public hearing on July 21, 2005 held in Poplar Bluff, Missouri in their comment letters.

Due to the similarity of the following eight (8) comments, one (1) response that addresses these comments can be found at the end of these eight (8) comments.

**COMMENT:** REGFORM supports the proposed move to delay the due date for some emissions fee payers to June, rather than April. REGFORM strongly supports the Air Program and appreciates its services and commitment to excellence and cooperation. REGFORM believes setting the emissions fee is important because it's the law and the law says we have got to get the number right. The Missouri Clean Air Law says we have got to protect and preserve air quality in the state of Missouri and maximize economic benefits to the people as well. Without the Air Program, the companies that REGFORM represents would not have access to the vital services they need to continue to do the business they do in Missouri.

However, REGFORM does not support the proposed emissions fee increase to \$35.50 from the present level of \$33.00. REGFORM proposes that the MACC adopt a \$34.50 per ton emission fee which is more reflective of the Consumer Price Index (CPI) increases applied over the years. REGFORM believes that starting back in 1993 at \$25.00 per ton and increasing that \$25.00 per ton rate every year by the CPI for that year that a number approximately equal to \$34.50 per ton would be arrived at today in 2005.

REGFORM believes that last year Title V fees generated seventy-three percent (73%) of revenues used to operate the Air Program. However, REGFORM believes something less than seventy-three percent (73%) is the actual amount of work that was performed on Title V projects. To put it plainly, REGFORM believes that Title V emissions fee payers are subsidizing other non-Title V beneficiaries.

There is also a related issue that REGFORM believes should be studied and that is industrial emissions are going down which indicates that industry is doing what it is suppose to do. The problem is as emissions go down so do the emissions fee generated. The only way to maintain revenues is to raise the emissions fee thus penalizing industry for reducing their emissions.

In addition, REGFORM desired to provide a clarification on two (2) issues. The first is that the proposed emissions fee of \$35.50 is a product of an internal set of calculations developed by the Air Program not by a consensus process involving a broad representative group of emissions fee payers. Most, if not all, of the permitted emissions fee payers who participate in the Air Program Advisory Forum (APAF) are REGFORM members. If APAF members did not speak out against the proposed emissions fee increase in those APAF meetings, it should not be construed that they support the emissions fee increase to \$35.50.

Second, REGFORM represents companies that pay nearly 80% of the fees generated by the annual per ton emissions fee. The fact that the MACC may not have received individual comment letters from electric utilities, cement kilns, auto assembly plants, chemical manufacturers, breweries, and other industrial emissions fee payers from around the state does not mean that they tacitly support an emissions fee increase to \$35.50 per ton. Rather, they have joined forces, pooled their resources, and hired a staff to represent them on these issues. The function of REGFORM is to present the MACC/Air Program an unified perspective that has the broadest support from industry and that perspective is not supportive of the proposed \$35.50 emissions fee.

COMMENT: Hercules Incorporated supports the testimony given by REGFORM on July 21, 2005 at the public hearing held in Poplar Bluff, Missouri (See REGFORM's general summary of testimony above). Hercules supports moving the payment date for emissions fee from April 1 to June 1 for all fee payers not just the utilities industry.

COMMENT: Laclede Gas Company (LGC) supports the testimony given by REGFORM on July 21, 2005 at the public hearing held in Poplar Bluff, Missouri (See REGFORM's general summary of testimony above). LGC does not support the proposed emissions fee increase, or at a minimum, only a modest increase. LGC is concerned that in addition to the financial impact of the proposed emissions fee increase on its organization that such an emission fees increase will act to discourage economic development in Missouri. LGC supports moving the emissions fee payment due date for some payers to better coincide with the state fiscal year.

COMMENT: Missouri Ag Industries Council, Inc. (Mo-Ag) supports the testimony given by REGFORM on July 21, 2005 at the public hearing held in Poplar Bluff, Missouri (See REGFORM's general summary of testimony above). Mo-Ag does not support the proposed emissions fee increase to \$35.50 because they believe it is out-of-line with the growth of the economy. It can support a fees increase from \$33.00 to \$34.50 more in line with the CPI. Mo-Ag recognizes and appreciates the positive changes that the Air Program has made over the past few years.

COMMENT: Associated Electric Cooperative supports the proposed change to move the payment of emissions fee for utilities from April to June and eventually to June for all emissions fee payers. The Cooperative supports a \$34.50 per ton emissions fee. The \$1.50 fee increase from the present \$33.00 emissions fee represents an increase of about 4.5% and is greater than the CPI increase last year. The Cooperative states that the electric utility industry is the primary source of Title V emissions fee for the department's Air Pollution Control Program and is

subsidizing the Program's operations. The Cooperative also states that mobile sources pay no emissions fee to the Air Program. As emissions from the electric utility industry are decreasing, the Cooperative believes discussions should be considered as to alternate sources to fund the Air Program in an equitable manner. The Cooperative stated that it recognizes the importance and value of the Air Program and that it is a professional organization that provides critical services to the businesses and citizens of Missouri.

COMMENT: City Utilities does not support the proposed emissions fee increase to \$35.50 per ton from the present fee of \$33.00 per ton. City Utilities believes that the proposed \$2.50 increase in the emissions fee, representing a 7.6% increase, is excessive. The Utility pointed out that other than the proposed emissions fee increase they recognize the positive changes that the Air Program has made over the past few years.

COMMENT: Empire District Electric supports the proposed change to move the payment of emissions fee for utilities from April to June and eventually to June for all emissions fee payers. Empire does not support the proposed emissions fee increase to \$35.50 per ton from the present fee of \$33.00 per ton. Empire believes that the proposed \$2.50 increase in the emissions fee, representing a 7.6% increase, is excessive. Empire supports a \$34.50 emissions fee because starting with an emissions fee of \$25.00 per ton in 1990 and increasing that fee by the CPI would bring the emissions fee to approximately \$34.50 per ton. As emissions from the electric utility industry are decreasing, the Empire believes discussions should be considered as to alternate sources to fund the Air Program in an equitable manner.

COMMENT: OsageSolutions believes in these times of strained state government finances that it is not prudent to bypass legislative restraint to propose higher emissions fee through the administrative rulemaking process even though the Air Program has the authority to do so. OsageSolutions believes there are strong arguments that the emissions fee should be kept at the current \$33.00 level. However, OsageSolutions is supportive of the argument and analysis suggested by Kevin Perry of REGFORM relative to an alternate proposed \$34.50 emissions fee related to the CPI. OsageSolutions urges the MACC to consider a minimum emissions fee increase with \$34.50 as the maximum increase.

RESPONSE: The Missouri Department of Natural Resources' Air Pollution Control Program is appreciative of industry's recognition of the vital services the Air Program provides to the regulated community. The department's Air Program is also pleased with industry's support of changing the emissions fee payment due date from April to June for the Electric Services Industry. The Air Program remains committed to eventually changing all emissions fee payers to the June date in the least disruptive manner to all stakeholders.

By State statute, the emission fee is set annually to fund the reasonable cost of administering the program. The Air Program maintained the fee at \$25.70 for almost a decade before requesting an adjustment to the rate. Last year in 2004, the fee was reduced 3% to demonstrate the department's commitment to keep the fee in line with the revenue required to operate the program.

A financial presentation was provided to the Air Advisory Forum March 10, 2005 and again April 28, 2005. Financial issues were discussed in an open forum and industry comments and concerns were addressed. Using the best information and estimates available, the Air Program proposed the \$35.50 per ton emissions fee required to generate enough cash flow to operate the Program through March 2007 when fees would be due again.

The Air Program is continually evaluating the program's financial situation and the program streamlining efforts and efficiencies that are being implemented will continue to be reflected in the spending numbers. Reducing the fee an additional \$1.00 as REGFORM suggests would result in a \$257,000 loss of revenue. If the commission adopts the fee proposed by REGFORM, et al, it will require a re-evaluation of projected expenditures. The expenditures over which the Air Program has control are limited. They include not filling vacancies, limiting travel and training, reducing procurements and reducing contracting for professional services such as permit reviews and modeling.

In comparison to the proposed emission fee, if EPA were to administer Missouri's Title V Program, the federal emissions fee would be \$39.61 per ton as calculated by the federal EPA. EPA's emissions fee of \$39.61 represents the original \$25.00 per ton fee from 1990 with yearly adjustments for the changes in the CPI. The Air Program's proposed \$35.50 emissions fee is 10.4 % less than EPA's current emissions fee of \$39.61 if they were to administer Missouri's Title V Program.

The discrepancy between REGFORM'S suggested \$34.50 fee rate and EPA's \$39.61 fee rate resulted by using 1993 rather 1990 for the beginning year. Although 1993 is the year that Missouri began collecting emission fees, the federal EPA calculates the federal fee rate based on 1990 which is the year that the Title V program was established.

Regarding REGFORM comments on the percentages of Title V fees used to operate the program, the Air Program provided information during the April 28, 2005, Air Advisory Forum presentation of revenue which excluded the Asbestos and Inspection Maintenance programs. Sixty-two percent (62%) of emission fee revenue is used to operate the program. Of this revenue fifty-nine and a half percent (59.5%) is Title V and two and a half (2.5%) is Non-title V emission fees.

The Air Program recognizes the importance of these issues to the future funding of the Program and the equitable resolution for the Program and the regulated community. The Air Program believes the appropriate forum to initiate discussion of these issues is the Air Program Advisory Forum and is open to begin initial discussion of these important issues.

No changes have been made to the proposed amendment language as a result of these comments.

Due to the similarity of the following five (5) comments, one (1) response that addresses these comments can be found at the end of these five (5) comments.

COMMENT: The City of St. Louis Department of Health is supportive of the proposed \$35.50 emissions fee. Funding to the City of St. Louis Air Pollution Control Program has remained constant for the past four (4) years, while the City has been asked to perform additional monitoring duties relative to PM<sub>2.5</sub> and PM<sub>10</sub> requiring sampling and the appropriate equipment. For Fiscal Year 2006, new monitoring activities are planned for Nitrogen Oxide, Sulfur Dioxide, formaldehyde, and ammonia.

COMMENT: The Kansas City Health Department is supportive of the proposed \$35.50 emissions fee. The fiscal funding has remained essentially constant or level for the past three (3) years. Yet, there have been increases in the direct costs related to personnel and fringe

benefits. Our professional staff provides the Kansas City metropolitan area assistance with permitting, monitoring, inspection, and enforcement issues. Any loss of state revenues would have a serious and adverse impact on the ability of the Health Department to protect the air quality and health of the Kansas City area. The Health Department considers itself as part of an essential partnership among the U.S. EPA, the Missouri Department of Natural Resources' Air Pollution Control Program, other metropolitan air programs in Missouri, and the regulated community to control air pollution for the citizens of Missouri.

COMMENT: The St. Louis County Health Department is supportive of the proposed \$35.50 emissions fee. A large part of the success of the Health Department in providing the County's citizens with air pollution control is directly related to the Agency receiving adequate funding for staff and operating expenses from the state. These funds provide the foundation for a number of air related activities, including interaction with our regulated community, assisting industry with permit applications, helping troubleshoot equipment and manufacturing processes, and streamlining the Environmental Inventory Questionnaire while providing cost effective and efficient service to the community and maintaining an air monitoring network used for determining attainment status in St. Louis County.

COMMENT: The Springfield-Greene County Health Department is supportive of the proposed \$35.50 emissions fee. Local agency resources have experienced level funding for several years. With the cost of equipment continuing to rise at a rapid rate, insurance and fringe costs steadily rising, we are now having to pick and choose between training and meetings. In addition, the local agencies are an important part of the state's air program and if the state's air program is underfunded, the citizens of the metro areas of the state will be underserved.

COMMENT: The U.S. EPA is supportive of the proposed \$35.50 emissions fee. We believe Missouri has shown that the proposed fee increase is necessary for them to maintain the integrity of their air program and provide necessary services to their stakeholders. In addition, as noted in the Executive Summary of the 2004 program review conducted by EPA, with the elimination of general revenue funds with the 2004 budget action, additional funds may be needed.

RESPONSE: The Air Program appreciates the Cities', Counties', and EPA's support of the proposed emissions fee of \$35.50 to maintain the financial integrity of the program to provide a viable program for the benefit of Missouri's citizens and their children. The proposed emission fee of \$35.50 per ton of regulated air pollutant will support a quality air pollution control program and assure federal obligations can be met. No wording changes have been made to the proposed rulemaking as a result of this comment.

						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Missouri SIP (Emission Statement Plan)				1/15/93	6/17/94					
	1/4/94	Complete 6/17/94	Approved 2/29/96							
Missouri SIP (St. Louis CO Maintenance Plan)	6/13/97	Complete 7/9/97	1/26/99 - EPA granted direct final approval - effective 3/29/99	No sanction clock applicable to nonclassifiable nonattainment areas.						
Missouri SIP (St. Louis 15% Rate of Progress Plan)				1/14/94	7/13/95					
	1/13/95	7/13/95 - All three submittals found complete.	3/18/96 - EPA proposed partial approval of all plan elements except I/M program. EPA proposed partial disapproval due to failure to implement enhanced I/M program.	Sanction clock will start if EPA publishes limited disapproval of 15% plan.						
	7/11/95									
	7/11/95									
	5/1/97	N/A (This action only addresses approvability)							Plan revised to clarify RVP waiver demonstration.	
11/12/99	Complete 12/22/99	Approved 5/18/00							Plan revised to include I/M and RFG provisions.	
Missouri SIP (St. Louis Contingency Plan)	10/6/97	Complete 10/8/97	4/19/01 - EPA proposed approval  Approved 6/26/01	4/11/96	10/8/97					Public hearing 7/24/97. MACC adopted Plan 8/28/97. MACC adopted Solvent Metal Cleaning rule 2/3/98. On 5/18/00, EPA approved Solvent Metal Cleaning rule as part of 15% RoP plan. Plan includes Tier II and low sulfur gasoline.
Missouri SIP (St. Louis Attainment Demonstration Plan)				6/22/95	4/22/96					
	10/25/95	Complete 4/22/96 Complete 12/22/99	4/17/00 - EPA proposed approval  8/3/00 - EPA reopened public comment period until 8/14/00.							Plan revised to comply w/new ozone standard and transport SIP call. MACC adopted Plan 11/8/99. On 1/19/00, DNR submitted supplemental model report. Additional modeling submitted 6/29/00. Supplemental model report presented at 8/31/00 MACC public hearing. MACC adopted Plan 9/21/00.
	11/12/99									
	11/2/00		4/3/01 - EPA proposed approval  Approved 6/26/01 (Court vacated)							On 6/26/01, EPA withdrew 3/19/01 attainment determination and approved attainment date extension to 11/15/04 and mobile source emissions budgets. On 11/25/02, US 7 <sup>th</sup> Circuit Court of Appeals ruled against EPA as follows: 1) EPA has no authority to grant attainment date extension; 2) 6/26/01 rule extending St. Louis attainment date vacated; 3) directs EPA to promulgate final rule classifying St. Louis as serious ozone nonattainment area.
	2/28/01									
12/13/02		1/30/03 - EPA proposed to approve revised mobile budgets  Approved 5/12/03							MOBILE6 model released 1/29/02. Revised mobile budgets based on Mobile 6 model presented to MACC at public hearings 10/23/02 (St. Louis) and 10/24/02 (Kirksville). MACC adopted Plan 12/5/02.	

**State Air Quality Plans Status Report  
August 08, 2005**

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Missouri SIP (Redesignation Demonstration and Maintenance Plan for Missouri Portion of St. Louis Ozone Nonattainment Area)	12/5/02	12/19/02	1/30/03 - EPA proposed approval of redesignation demonstration and maintenance plan.  Approved 5/12/03							Plan and redesignation request presented to MACC at public hearing 10/23/02 (St. Louis) and 10/24/02 (Kirksville). MACC adopted Plan 12/5/02.
Missouri SIP (St. Louis 8-Hour Ozone/PM2.5 Plan)	8/1/03									In 2000, DNR submitted recommendation on 8-hr nonattainment boundaries. On 6/2/03, EPA published proposed 8-hr Ozone NAAQS rule. On 4/30/04, EPA designated St Louis as Moderate for 8-hr Ozone NAAQS. On 9/23/04, Illinois EPA and Missouri hosted joint mtg to initiate St. Louis 8-hr Ozone/PM2.5 SIP development stakeholder groups. On 1/5/05, EPA published area designations/classifications for Fine Particle NAAQS (St. Louis as Unclassifiable/Attainment). In Mar-05, contract awarded to Environ and Alpine Geophysics (EnvironAG) to assist w/emissions and photochemical modeling. Contract effective date 4/1/05. On 4/15/05, Control Strategy (CS) group met to discuss draft CS whitepapers (prepared by MDNR and Illinois EPA) and process for prioritizing and evaluating strategies. On 5/11/05 and 5/24/05, Modeling group conference calls w/ Contractors to discuss onroad mobile/biogenic emissions. On 6/7/05, CS group met to review photochemical modeling results from Midwest Regional Planning Organization (RPO) and discuss evaluation of CS options. On 6/8/05, Modeling group conference call w/Contractors to discuss emissions and meteorological modeling issues. On 6/22/05, Modeling group conference call w/Contractors to discuss emissions issues and initial June 2002 episode photochemical modeling run. <b>On 7/13/05, Modeling group conference call w/Contractors to discuss ideas for improving performance of initial June 2002 episode photochemical modeling run.</b> <b>Next modeling group conference call w/contractors scheduled 8/10/05.</b>
	1/3/05		1/26/05 - EPA approved revised mobile budgets							Plan revised to establish 2007 motor vehicle emissions budgets. Public hearing on proposed budgets 10/28/04. MACC adopted Plan 12/9/04.
Missouri SIP (I/M Plan)				1/15/93	9/1/94					
	9/1/94 (Temporary rule)	Complete 9/1/94 Contingent on Plan revision submittal of permanent rule	3/18/96 - EPA proposed disapproval of I/M Plan (lack of adequate resources to implement)	Sanction clock starts if EPA publishes final disapproval						Contract awarded 2/24/99 and testing begins 4/5/00. <b>Over 4,231,957 vehicles tested since I/M program start.</b> In 2003, General Assembly did not renew appropriations for additional I/M station in South County.
	7/11/95 (Permanent rule)		Approved 5/18/00							
	12/9/02	12/30/02	5/12/03 - EPA approved I/M rule revisions - effective 5/12/03							MACC adopted proposal implementing on-board diagnostics (OBD) testing 4/25/02 (advisory-only). MACC adopted rule implementing OBD testing 8/29/02.
	10/2/03	12/1/03								MACC adopted revised Plan to incorporate rule and legislative changes 8/23/03.
										Plan being revised to incorporate HB 697 legislative changes. <b>Draft rulemaking started Jun-05.</b> On 6/6/05, pass/fail OBD tests (<1996 vehicles) started.

Missouri SIP (New Source Review Plan)	4/6/94	Complete 6/17/94	Approved 2/29/96	1/15/93	6/17/94					
Missouri SIP (St. Joseph Light & Power SO <sub>2</sub> Attainment Plan)	7/13/01	Complete 8/15/01	11/15/01 - EPA granted direct final approval - effective 1/14/02							As of 5/25/01, consent agreement between St. Joseph Light & Power and State of Missouri to avoid SO <sub>2</sub> nonattainment designation signed by all parties. Public hearing for consent agreement 2/6/01. MACC adopted 3/29/01.
Missouri SIP (Springfield City Utilities SO <sub>2</sub> Consent Agreement)	1/2/02	Complete 2/1/02	3/25/02 - EPA granted direct final approval - effective 5/24/02							Added consent agreement to incorporate Springfield City Utilities SO <sub>2</sub> control strategy. MACC adopted 12/6/01.
Missouri SIP (St. Louis Transportation Conformity Plan and Rule)	2/14/95	Complete 5/16/95	Approved 2/29/96							Original Plan
										Program working on Plan revision to incorporate six (6) federal transportation conformity rule amendments in one Plan revision. 4 of the 6 federal rule amendments adopted into State rules. EPA combined 5th and 6th amendments into one federal rule amendment published in 7/1/04 Federal Register. State rule amendment developed to incorporate federal changes. Public hearing for rule amendment 6/30/05. MACC adopted rule amendment 7/21/05.
Missouri SIP (Kansas City Transportation Conformity Plan and Rule)	2/14/95	Complete 5/16/95	Approved 2/29/96							Original Plan
										Program working on Plan revision to incorporate six (6) federal transportation conformity rule amendments in one Plan revision. 4 of the 6 federal rule amendments adopted into State rules. EPA combined 5th and 6th amendments into one federal rule amendment published in 7/1/04 Federal Register. State rule amendment developed to incorporate federal changes. Public hearing for rule amendment 6/30/05. MACC adopted rule amendment 7/21/05.
Missouri SIP (General Conformity Plan and Rule)	2/14/95	Complete 5/16/95	3/11/96 - Conditional approval w/6.300 revisions.							Rule effective date 9/30/96.
	11/20/96	Complete 2/24/97	Approved 7/14/97							
Missouri SIP (NOx RACT Plan)				7/6/94	7/3/96	1/6/96	7/3/96			
	11/30/95 (Waiver)									Submitted waiver application for CAAA Sect. 182(f) 11/30/95. EPA issues transport SIP call 10/10/97.
	4/26/96 (Draft Plan)									NOx RACT Plan identifying NOx RACT as the NOx limitations required for utility boilers under Title IV acid rain program being submitted.
	7/1/96 (Final Plan)	Complete 7/3/96								Public hearing for proposed Plan 5/30/96. MACC adopted proposed Plan 6/27/96.
	11/12/99	Complete 12/22/99	Approved 5/18/00							Incorporates new NOx RACT rule.

4

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Missouri SIP (NOx Transport Plan)										On 3/3/00, court ruled on NOx SIP call petitions and removes Missouri from NOx SIP call. EPA approved statewide NOx rule 12/28/00. Proposed NOx SIP call for Missouri released 2/23/02. On 4/21/04, EPA finalized Phase II NOx SIP call. Missouri to submit SIP meeting full NOx SIP call by 5/1/05. Utility Workgroup mtgs 10/19/04 (non-electricity generating units-EGUs) and 10/25/04 (EGUs). On 12/8/04, EGU workgroup reached agreement in concept on proposed EGUs and non-EGU boilers rules. On 1/31/05, met w/cement kiln industry and reached consensus on draft cement kiln rule. Public hearing for 3 new NOx rules 4/28/05. MACC adopted rules 5/26/05. Public hearing for NOx SIP call Emissions Budget Demonstration for Missouri 5/26/05. MACC adopted Budget Demonstration 6/30/05.
Missouri SIP (Kansas City 8-Hour Ozone Plan)	8/1/03									In 2000, DNR submitted 8-hr Ozone nonattainment boundaries recommendation. On 6/2/03, EPA published proposed 8-hr Ozone NAAQS rule. MACC adopted boundary recommendation 7/24/03. On 4/30/04, EPA designated Kansas City as Unclassifiable/Attainment for 8-hr Ozone NAAQS. Action effective 6/15/04. On 9/10/04, MARC hosted community workshop to discuss alternative strategies to achieve compliance w/new 8-hr Ozone standard and long-term clean air. On 12/21/04, MDNR submitted letter to EPA to certify monitoring data and to recommend Kansas City be redesignated as Attainment for 8-hr Ozone NAAQS. On 3/29/05, MARC board approved Clean Air Action Plan (CAAP). On 5/3/05, EPA redesignated Kansas City as Attainment for 8-hr Ozone NAAQS. Final rule effective 6/2/05. <b>On 7/12/05, MARC board hosted mtg w/EPA, KDHE and MDNR to initiate discussions on SIP tasks.</b>
Missouri SIP (Kansas City Maintenance Plan)										On 2/5/96, rec'd EPA formal notice of ozone violation (based on EPA quality assured data) in Kansas City metro area which requires contingency measures. Contingency measures recommendations presented at 8/29/96 MACC mtg.
	3/16/98	Complete 5/21/98	1/26/99 - EPA granted approval (RFG incorporated by 2000)  Approved 4/24/02							MACC adopted revised Plan 2/3/98. US Court of Appeals struck down EPA's rule for use of RFG in former nonattainment areas. On 8/22/00, Missouri governor committed to implement 7.0 RVP gasoline, a cold cleaning solvent regulation, and a pressure vacuum relief valve requirement for gasoline dispensing. RVP rule and fuel waiver submitted to EPA on 5/21/01.
	12/12/02	Complete 12/30/02	9/16/03 - EPA proposed approval  Approved 1/13/04							MOBILE6 model released 1/29/02. MACC adopted subsequent 10-yr plan 7/25/02. MACC adopted revised mobile budgets 12/5/02. On 6/5/03, EPA informed public that revised motor vehicle emission budgets are adequate for conformity purposes.
										Plan revision required when 1-hr Ozone standard revoked 6/15/05. On 5/3/05, conference call w/KDHE and MARC to discuss options for addressing 1-hr Ozone Maintenance Plan revocation. 2002 Maintenance Plan revised to include 8-hr Ozone NAAQS and 8-hr Ozone NAAQS contingency measure triggers. Public hearing for 2005 revised Plan 6/30/05. <b>MACC adopted 2005 revised Plan 7/21/05.</b> New 8-hr Ozone Maintenance Plan deadline 6/15/07.

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Title V Operating Permit Plan (Although not a SIP, plan has similar requirements and impacts)				11/15/93	3/2/95					
	1/13/95	Complete 3/2/95	4/11/96 - EPA granted interim approval of operating permit program Approved 5/14/97							Operating Permit Program effective date 5/13/96. Full approval effective 6/13/97.
	5/6/03	Complete 5/22/03	9/17/03 - EPA granted direct final approval - effective 11/17/03							On 3/25/02, EPA issued Notice of Deficiency for the Operating Permit Program because some State requirements do not comply w/CAA and 40 CFR 70 requirements. MACC adopted Plan revision and rule change 12/5/02.
										Program working on Plan revision to streamline Basic and Intermediate Operating Permits to minimize workload for both industry and program staff while maintaining NAAQS. As result of stakeholder review, MACC approved rule variance while amended rule is being developed. Public hearing for rule amendment 3/31/05. MACC adopted rule amendment 4/28/05.
Missouri SIP (Glover Lead Plan - Doe Run/ formerly ASARCO)	8/13/96	Complete 9/18/96	Approved 5/5/97	8/2/93	9/18/96	2/2/95	9/18/96	8/2/95	9/18/96	Air quality monitoring data continues to show Lead standard attainment after controls installed. Amended consent decree filed Sept-99.
	7/31/00	Complete 9/5/00	12/5/01 - EPA proposed approval Approved 4/16/02							Plan revised to change ownership via new consent decree. MACC adopted Plan revision 5/25/00.
	1/26/04		6/30/04 - EPA proposed approval effective 8/30/04 unless adverse comments received by 7/30/04 Direct final rule withdrawn 8/24/04 due to adverse comment 10/29/04 - EPA granted final approval - effective 11/29/04							On 12/1/03, Glover smelter ceased operations w/plans to reopen in future. DNR advised Doe Run that certain emission compliance and maintenance plan reporting requirements could be discontinued until plant restart. DNR discontinued monitoring Jun-04. DNR retains ability to restart monitoring w/ sufficient lead time should plant begin smelting. On 10/29/04, EPA published final rule addressing adverse comment, redesignated area to attainment for Lead and approved Maintenance Plan. Doe Run utilizing unloading building to store and transport concentrate ores.
Missouri SIP (Herculaneum Lead Plan - Doe Run)				1/4/94	12/15/94					
	6/3/91  7/2/93 6/30/94 11/23/94	Complete 7/9/91  Complete 9/30/93 Complete 2/23/94 Complete 12/15/94	Limited approval rec'd 3/6/1992  Full approval on all 4 submittals together on 5/5/95							Area failed to attain Lead standard for 3 <sup>rd</sup> quarter of 1995. All contingency measures implemented and area still failed to attain Lead standard.
	1/9/01	Complete 1/18/01	12/5/01 - EPA proposed approval Approved 4/16/02	7/28/99	1/18/01					On 12/7/00, MACC adopted Plan revision and Lead rule. Court signed Consent Judgement 1/5/01. 1 <sup>st</sup> quarter 2005, Broad Street monitor measured 1.88 ug/m <sup>3</sup> , representing a violation of the Lead NAAQS (1.50 ug/m <sup>3</sup> ). Last failure to attain at this monitor occurred 2 <sup>nd</sup> quarter 2002. On 4/22/05, facility was issued a Notice of Violation. Program working w/Doe Run and EPA to resolve issue, <b>establish potential contingency measures and identify additional permanent and enforceable controls to reduce air impacts.</b> <b>2<sup>nd</sup> quarter 2005, Broad Street monitor measured 1.46 ug/m<sup>3</sup>.</b> Doe Run requested to amend SIP to allow facility to change baghouse bag vendors to increase bag life, and to reduce maintenance and energy costs. Public hearing on Consent Judgement modification 6/30/05. <b>MACC adopted Consent Judgement modification 7/21/05.</b>

August 08, 2005**

7

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Missouri SIP (Revised NAAQS Plan)										<u>Ozone</u> Continuing to monitor 8-hr Ozone NAAQS. On 6/2/03, EPA published proposed 8-hr Ozone NAAQS rule. On 4/30/04, EPA published area designations and classifications for 8-hr Ozone NAAQS (Kansas City as Unclassifiable/Attainment and St. Louis as Moderate). On 9/27/04, submitted latest Clean Air Act Section 110 Plan commitment letter to EPA. On 12/21/04, submitted letter to EPA to certify monitoring data and to recommend Kansas City be designated Attainment for 8-hr Ozone NAAQS. On 5/3/05, EPA redesignated Kansas City as Attainment for 8-hr to initiate discussions on SIP tasks. EPA developing Implementation Rule.
										<u>PM2.5</u> Continuing to monitor PM2.5. On 9/27/04, submitted latest Clean Air Act Section 110 Plan commitment letter to EPA. On 1/5/05, EPA published area designations/classifications for Fine Particle NAAQS (St. Louis as Unclassifiable/Attainment). EPA developing Implementation Rule.
Missouri SIP (Regional Haze Plan)										Final federal regional haze rule published 7/1/99. Final rule SIP <b>submittal</b> deadline May 2008. Tasks complete: previous yrs grant applications (EPA approved), RPB structure/budget, by-laws, articles of incorporation, individual workgroup plans, and workgroup chairs guidelines. Leanne Tippet Mosby appointed to Policy Oversight Group. On 11/15/04, Best Available Retrofit Technology (BART) survey sent to industries to determine affected BART sources. 14 sources identified as potential BART eligible (8 of the 14 are electric utilities). For individual workgroup progress, see Web site www.cenrap.org. Attended CENRAP workgroup mtg 8/1/05-08/04/05 and discussed emissions and air quality modeling updates. See Attachment A for schedule timeline.
Missouri SIP (New Source Review (NSR) Reform)										On 12/31/02, EPA published final New Source Review (NSR) Reform rule. In 2003, New York and other states challenged rule objecting to the actual-to-projected-actual emission test rather than the potential-to-potential emissions test. On 6/24/05, US Appeals Court (DC Circuit) ruled to: (1) uphold use of past actual-to-projected future actual emissions, a 10-yr lookback for selecting 2-yr baseline and plantwide applicability limits; (2) vacate the Clean Unit applicability test and the Pollution Control Project exemption; and (3) remand recordkeeping provisions back to EPA for explanation or appropriate alternative. Draft rule in 60-day public comment phase. SIP submittal deadline 1/2/06.

August 08, 2005**

8

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Missouri SIP (Clean Air Interstate Rule and Clean Air Mercury Rule)										On 3/15/05, EPA issued the Clean Air Interstate Rule (CAIR) to reduce air pollution that moves across state boundaries. On 3/15/05, EPA issued the Clean Air Mercury Rule (CAMR) to permanently cap and reduce mercury emissions from coal-fired power plants. On 06/27/05, EPA Region 5 & 7 states workgroup met to discuss rule implementation issues and model rule. On 6/30/05, electrical utilities workgroup met to discuss rule implementation issues, model rule and rule development. Stakeholder meetings to be scheduled Aug-05.

**Note: Shaded blocks indicate changes and/or additions from previous report.**

\* Failure to meet any of these dates or Plan requirements, starts the 18 month sanction clock.  
If requirement is not met within 18 months, the 2:1 emissions offset ratio sanction is imposed.  
If requirement is still not met within 24 months, the sanction that withholds highway funds is imposed.

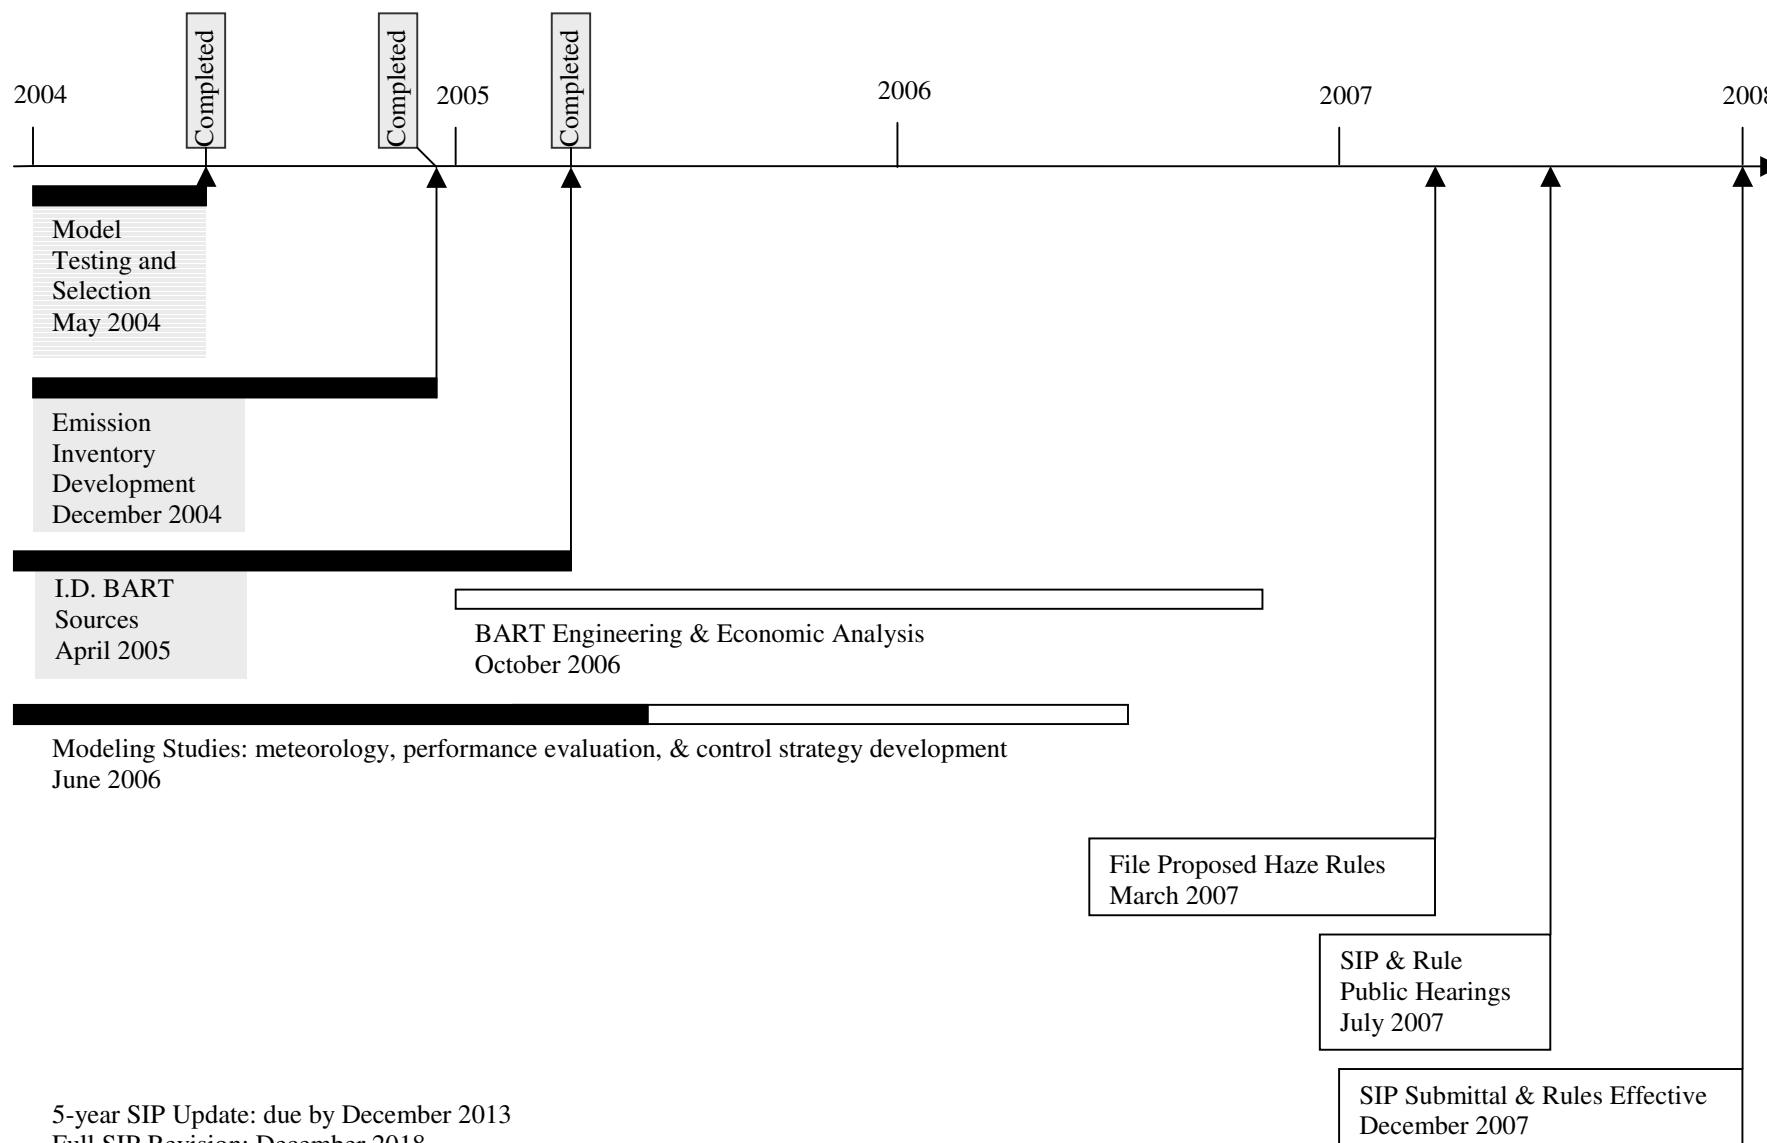

\*\* Sanction clock starts with: 1) EPA letter to Governor for failure to submit or finding of incompleteness; or 2) EPA Federal Register final notice of Plan disapproval or nonimplementation.  
Sanction clock stops with EPA letter to department director of finding of completeness.

Updated as of 08/05/05 (bdv)

## MEMORANDUM

DATE:

TO: Missouri Air Conservation Commission

THROUGH: Daniel R. Schuette, Interim Division Director  
Air and Land Protection Division

FROM: Leanne Tippet Mosby, Director  
Air Pollution Control Program

SUBJECT: Attorney General's Office Referral Request – Morgan Development Company

On February 3, 2004, a representative of the Missouri Department of Natural Resources' Northeast Regional Office (NERO) investigated a complaint at 100 South Main Street in Fayette, Missouri. The investigation disclosed that Morgan Development performed a renovation project without first inspecting for the presence of asbestos containing materials (ACM). Failing to inspect for ACM prior to performing a renovation activity is a violation of Missouri State Rule 10 CSR 10-6.080, which adopts by reference 40 CFR Part 61, Subpart M - *National Emission Standard for Asbestos*. Subsequently, the NERO issued Notice of Violation (NOV) #0723NE to Morgan Development.

On April 1, 2004, the Air Pollution Control Program (APCP) sent a \$2,000 settlement offer letter via certified mail to Morgan Development. The letter requested that Morgan Development contact the department by April 26, 2004, to discuss a resolution.

On April 26, 2004, the APCP contacted Mr. Robert Morgan of Morgan Development Company regarding the settlement offer letter. However, this discussion did not result in an agreement being reached.

On April 30, 2004, Mr. Morgan responded to NOV #0723NE, via letter to the APCP. Mr. Morgan indicated he had spoken with departmental staff from the State Historic Preservation Office and none of them had ever mentioned that a "Phase I" needed to be performed. (A Phase I is an initial environmental assessment that is limited to a historical records search to determine potential environmental concerns at a site.)

On May 18, 2004, the APCP contacted Mr. Morgan in reply to his response letter. Program staff explained to him a Phase I, and an asbestos inspection are not the same thing, and an asbestos inspection must be performed by a certified asbestos inspector prior to any renovation.

On May 19, 2004, Mr. Morgan contacted the APCP indicating it was unfair for the APCP to penalize him when department representatives from the State Historic Preservation Office were on site and didn't relay the requirements to him. Mr. Morgan then said he always had a Phase II performed when he felt there were any environmental concerns. (A Phase II is a site investigation that includes tests performed at the site to confirm the location and identity of environmental hazards.) The APCP informed Mr. Morgan that a Phase II also does not meet the requirements of an asbestos inspection. A Phase II in some cases may generally identify asbestos as a concern in a structure, however, they generally do not assess a structure in enough detail to identify the location, type, percent and condition of the material as is required in an asbestos inspection report.

On May 27, 2004, a representative of the NERO performed an asbestos investigation at a demolition site located at 600 South Church Street in Fayette, Missouri. The investigation disclosed Morgan Development performed the demolition without first having the building inspected for asbestos containing materials. Mr. Morgan stated the building was demolished on May 25, 2004, and a Phase I was performed and would have identified any asbestos containing materials. The NERO representative stated to Mr. Morgan that a Phase I does not meet the requirements of an asbestos inspection. Subsequently, the NERO issued NOV #0817NE to Morgan Development.

On June 14, 2004, Morgan Development Company was sent NOV #0817 via certified mail. The APCP later received certified NOV back as unclaimed.

On July 1, 2004, the APCP contacted the State Historic Preservation Office to determine their involvement with the project. They indicated they were familiar with the project and it was one of their historic tax credit projects. They indicated in the Spring of 2002 they were contacted by Ms. Kathy McDougal, the Economic Development Director for the City of Fayette, concerning the repair of the roof for the structure, and they provided her with technical assistance related to the roof work. They also indicated they had not spoken to Mr. Morgan directly about the project and they had never made a site visit.

On July 20, 2004, the APCP sent a \$4,000 settlement offer letter via certified mail to Morgan Development Company. The letter requested Morgan Development to respond to the letter by August 11, 2004. The certified letter was later returned to the APCP as unclaimed.

On August 16, 2004, representatives from the APCP and NERO delivered NOV #0817NE and the new proposed settlement offer letter to Mr. Bob Morgan of Morgan Development Company. Mr. Morgan refused to sign for the letters but did receive and take them. Mr. Morgan disagreed with the additional NOV and with the increased settlement offer from \$2,000 to \$4,000. Mr. Morgan counter offered a settlement of \$500 to close the case; otherwise he would forward the case over to his attorney. The program did not accept this offer.

As of this date, Morgan Development and the APCP have been unable to reach a mutually agreeable settlement. The APCP is requesting authorization to refer this matter to the Attorney General's Office for appropriate legal action. I recommend your approval of this action.

## MEMORANDUM

DATE:

TO: Missouri Air Conservation Commission

THROUGH: Daniel R. Schuette, Interim Division Director  
Air and Land Protection Division

FROM: Leanne Tippet Mosby, Director  
Air Pollution Control Program, ALPD

SUBJECT: Attorney General's Office Referral Request – Mr. Ron Sells

On September 9 and September 15, 2004, a representative of the Missouri Department of Natural Resources' Southeast Regional Office (SERO) conducted an air pollution control inspection at Mr. Ron Sells' property located near Two Mile Road, South of Dexter, Stoddard County, Missouri. Mr. Sells contracted with C & M Contractors who excavated soil from the site and moved it to the new Wal-Mart Supercenter, near Dexter, Missouri. The Regional Office received several complaints of large amounts of particulate matter (PM) emitted into the air and settling on adjoining property. This is a violation of Missouri State regulation 10 CSR 10-6.170, "*Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin.*" The SERO issued Mr. Ron Sells Notices of Violation (NOV) #3150SE and #3156SE on September 20, 2004 and October 7, 2004, respectively.

A summary of the events are listed as follows:

- On September 3, 2004, the Regional Office received a complaint that excavation of the site was creating a lot of dust in the air. The SERO investigated the property on September 9, 2004 and attempted to contact Mr. Sells between September 9-13, 2004.
- On September 11, 2004, citizens called in complaints to the Stoddard County Sheriff's Department.
- On September 13, 2004, the SERO staff spoke with Mr. Sells and C & M Contractors. During the conversation, both agreed to put gravel down on the haul roads by the day's end and then begin daily water applications for dust control.

- On September 15, 2004, the SERO staff visited the site and found neither the owner nor the operators at the site used gravel or daily water applications for dust control.
- On September 20, 2004, the SERO issued Mr. Sells NOV #3150SE for violation of 10 CSR 10-6.170, "*Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin.*"
- On October 1, 2005, the Regional Office received another complaint of PM in the air created by the excavating and transporting of soil.
- On October 4, and October 6, 2004, the SERO staff inspected the site and observed PM in the air and leaving the premises of origin. The staff noticed a "thin" layer of gravel placed on the haul road. However, the inspector did not notice if a water truck was on the site. The prevent dust a water truck must continually work the area and locations where the dump trucks enter and exit the property.
- On October 7, 2004, the Regional Office staff issued NOV #3156SE for violation of 10 CSR 10-6.170, "*Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin.*"
- On October 7, 2004, the department's Air Pollution Control Program (APCP) mailed a memorandum to the Attorney General's Office (AGO) requesting the collection of a prior suspended penalty.
- On October 15, 2004, the APCP received an information packet from Ms. Mary Lou Taylor, a private citizen impacted by the dust. The packet contained several pictures of dust from the excavation that had settled on various properties. It also contained a news article from the Dexter Daily Statesman Newspaper asserting citizens were complaining of the dust problems. Further, the information packet also contained 23 signatures agreeing with the complaint.
- On October 28, 2004, the APCP mailed a \$10,000 settlement offer to Mr. Sells.
- On November 2, 2004, Mr. Sells received the settlement offer. After speaking with the SERO and reviewing the file, the APCP communicated with Mr. Sells the willingness to accept \$5,000 paid and \$5,000 suspended on the condition of no other violations for two years. Mr. Sells said he would speak to C & M Contractors and his attorney.
- On November 12, 2004, the APCP received a letter from Mr. Steve Holden (attorney for Mr. Ron Sells). The letter stated the emission of PM was unintentional and avoidance was nearly impossible due to drought conditions suffered in Dexter during the summer. Mr. Holden thought C & M Contractors settled their NOV's with \$1,000. The APCP negotiated a settlement with C & M Contractors of \$500 paid penalty with \$3,500 suspended

on the condition of no other violations for two years. Before these events of PM emitted beyond the premises of origin, C & M Contractors received no other NOV's. In addition to the recent events of PM emitted beyond the premises of origin, Mr. Sells received a prior NOV for illegal open burning. To resolve the open burning NOV, Mr. Sells signed a settlement agreement of \$1,000 paid and \$1,000 suspended for two years upon no further violations. The settlement agreement is still in effect and the department, through the AGO, is currently attempting to collect the \$1,000 due for violation of the settlement agreement.

- On November 16, 2004, the APCP spoke with Mr. Holden and communicated the willingness to settle for \$4,000 paid and \$6,000 suspended on the condition of no other violations for two years or \$6,000 paid with no suspended amount.
- On November 22, 2004, the APCP received a counter offer of \$1,000 from Holden Law Office for NOV #3150SE and NOV #3156SE.
- On December 2, 2004, Mr. Holden contacted the APCP and said Mr. Sells indicated all he did is sell dirt to a contractor. He contacted the contractor to stop the emission of dust but he cannot make them change their way of business. After APCP staff explained the process, he asked the program to refer the case to the Missouri Air Conservation Commission.

In light of failure to resolve the violations, the APCP is requesting authority to refer the case to the AGO. I recommend approval of this action.
